What is Murata Power Solutions?

As a lead supplier in e-mobility, manufacturing, industrial, and robotics applications, we can help you easily find sustainable power solutions for your electrical engineering needs. Our top products include DC-DC power converters, AC-DC power supplies, and open compute data center solutions that are high efficient and market leading in power density. With 1,000+ employees worldwide, Murata Power Solutions (MPS) has engineering and design centers in the US (California & Massachusetts), Canada (Toronto), the UK (Milton Keynes), and China. Established in 2007, MPS (located in Westborough, MA) was acquired by Murata Manufacturing Corporation (MMC). MMC is our parent company with headquarters in Kyoto, Japan. MPS shares in MMC's quality philosophy of building long-lasting partnerships with customers and contributing to a better society.

Hear from our Employees

Janviere Umuhoza

Electrical Design Engineer
MPS Westborough

MPS stands out to me as a place to work, because I get to work with a Global Community (North America, Asia, and Europe). Each employee is fully supported by the management team. Within MPS organization, there is a great teamwork spirit within each department and across departments. In addition to that, MPS has a footprint in various technology areas (ex: Power Solutions for IOT, Datacenters, industrial applications, communication systems, railway applications, electric vehicles, etc.). Developing innovative products, ideas and solutions has enabled MPS to continually support new and emerging markets and expand into new business domains. As an employee for MPS, learning is a part of a continuous improvement process that you follow as you work on various projects. Employees are engaged and have opportunities for career growth/development.

Gracia Gracia

Senior Buyer/Administrative Resources Supervisor
Calex (A division of MPS)

Murata Power Solutions provided me with the most diverse job experience. I am currently a senior buyer who assisted in finance tasks, general administrative work, and as a human resource site representative. This enabled me to learn new skills through cross training. The people I work with on a day-to-day basis are great! The Concord site is small which helps keep the family feel in the workplace. I love that it is a flexible work environment which allows me to have great work life balance.

Royston Dsouza

Senior Embedded Electrical Designer
MPS Toronto

MPS is built on strengths of a very diverse workforce. Inclusivity at MPS doesn't just allow people to work here, but truly value their contributions and appreciate their contributions. I feel safe working at MPS, where I am never judged for my ethnicity, gender and religion, but always treated with respect and provided with equal growth opportunities. Engineering projects at MPS provide a balance between exercising my current skills and acquiring new ones. The trainings I receive at MPS help me grow holistically in my personal and professional life. I am proud to be a part of an organisation that fosters growth and a safe environment while contributing to the advancement of society. Join our family at MPS to experience learning, inclusivity, appreciation and value.
