

# Type 1ZM Wi-Fi® + Bluetooth® Module

NXP 88W8987 Chipset for 802.11a/b/g/n/ac + Bluetooth 5.1  
Datasheet - Rev. R

- Design Name: Type 1ZM
- P/N: LBEE5QD1ZM-572

## Table of Contents

|   |    |
|---|----|
| 1 Scope .....   | 8  |
| 2 Key Features .....                                    | 8  |
| 3 Ordering Information.....                             | 8  |
| 4 Block Diagram .....                                   | 9  |
| 5 Certification Information.....                        | 10 |
| 5.1 Radio Certification .....                           | 10 |
| 5.2 Bluetooth Qualification .....                       | 10 |
| 6 Dimensions, Marking and Terminal Configurations ..... | 11 |
| 7 Module Pin Descriptions.....                          | 13 |
| 7.1 Pin Assignments.....                                | 13 |
| 7.2 Pin Descriptions.....                               | 14 |
| 7.3 Configuration Pins .....                            | 17 |
| 7.4 Pin States .....                                    | 17 |
| 7.5 SDIO Pin Descriptions.....                          | 19 |
| 8 Absolute Maximum Ratings.....                         | 19 |
| 9 Operating Conditions.....                             | 20 |
| 9.1 Operating Conditions.....                           | 20 |
| 9.2 External Sleep Clock Requirements .....             | 20 |
| 9.3 PMIC_EN I/O Requirement.....                        | 21 |
| 9.4 Digital I/O Requirements .....                      | 21 |
| 9.5 Package Thermal Conditions .....                    | 22 |
| 10 Power Sequence .....                                 | 22 |
| 10.1 Power-On Sequence .....                            | 22 |
| 10.2 Power-Off Sequence .....                           | 23 |
| 11 Interface Timing .....                               | 24 |
| 11.1 SDIO Timing .....                                  | 24 |
| 11.1.1 Default Speed Mode.....                          | 24 |
| 11.1.2 High Speed Mode.....                             | 24 |
| 11.1.3 SDR12, SDR25, SDR50 Modes (up to 100 MHz) .....  | 25 |
| 11.1.4 SDR104 Mode (208 MHz) .....                      | 26 |
| 11.1.5 DDR50 Mode (50 MHz).....                         | 27 |
| 11.2 High Speed UART Specifications .....               | 28 |
| 11.3 Bluetooth PCM Timing .....                         | 28 |
| 11.3.1 Master Mode.....                                 | 29 |
| 11.3.2 Slave Mode.....                                  | 30 |

|  |    |
|--|----|
| 12 DC/RF Characteristics.....                                      | 31 |
| 12.1 DC/RF Characteristics for IEEE 802.11b - 2.4 GHz .....        | 31 |
| 12.1.1 High-Rate Condition for IEEE 802.11b - 2.4 GHz .....        | 32 |
| 12.1.2 Low-Rate Condition for IEEE 802.11b - 2.4 GHz .....         | 33 |
| 12.2 DC/RF Characteristics for IEEE 802.11g - 2.4 GHz .....        | 34 |
| 12.2.1 High-Rate Condition for IEEE 802.11g - 2.4 GHz .....        | 34 |
| 12.2.2 Low-Rate Condition for IEEE 802.11g - 2.4 GHz .....         | 35 |
| 12.3 DC/RF Characteristics for IEEE 802.11n - 2.4 GHz .....        | 36 |
| 12.3.1 High-Rate Condition for IEEE 802.11n - 2.4 GHz .....        | 36 |
| 12.3.2 Low-Rate Condition for IEEE 802.11n - 2.4 GHz .....         | 37 |
| 12.4 DC/RF Characteristics for IEEE 802.11a - 5 GHz .....          | 38 |
| 12.4.1 High-Rate Condition for IEEE 802.11a - 5 GHz .....          | 38 |
| 12.4.2 Low-Rate Condition for IEEE 802.11a - 5 GHz .....           | 39 |
| 12.5 DC/RF Characteristics for IEEE 802.11n (HT20) - 5 GHz.....    | 40 |
| 12.5.1 High-Rate Condition for IEEE 802.11n (HT20) - 5 GHz.....    | 40 |
| 12.5.2 Low-Rate Condition for IEEE 802.11n (HT20) - 5 GHz.....     | 41 |
| 12.6 DC/RF Characteristics for IEEE 802.11ac (HT20) - 5 GHz.....   | 42 |
| 12.6.1 High-Rate Condition for IEEE 802.11ac (VHT20) - 5 GHz.....  | 43 |
| 12.6.2 Low-Rate Condition for IEEE 802.11ac (VHT20) - 5 GHz.....   | 44 |
| 12.7 DC/RF Characteristics for IEEE 802.11n (HT40) - 5 GHz.....    | 45 |
| 12.7.1 High-Rate Condition for IEEE 802.11n (HT40) - 5 GHz.....    | 45 |
| 12.7.2 Low-Rate Condition for IEEE 802.11n (HT40) - 5 GHz.....     | 46 |
| 12.8 DC/RF Characteristics for IEEE 802.11ac (VHT40) - 5 GHz ..... | 47 |
| 12.8.1 High-Rate Condition for IEEE 802.11ac (VHT40) - 5 GHz.....  | 47 |
| 12.8.2 Low-Rate Condition for IEEE 802.11ac (VHT40) - 5 GHz.....   | 48 |
| 12.9 DC/RF Characteristics for IEEE 802.11ac (VHT80) - 5 GHz ..... | 49 |
| 12.9.1 High-Rate Condition for IEEE 802.11ac (VHT80) - 5 GHz.....  | 50 |
| 12.9.2 Low-Rate Condition for IEEE 802.11ac (VHT80) - 5 GHz.....   | 51 |
| 12.10 DC/RF Characteristics for Bluetooth.....                     | 52 |
| 12.10.1 Basic Data Rate Condition .....                            | 52 |
| 12.10.2 Enhanced Data Rate Condition .....                         | 53 |
| 12.11 DC/RF Characteristics for Bluetooth Low Energy .....         | 54 |
| 12.11.1 1 Mbps PHY Condition .....                                 | 54 |
| 12.11.2 2 Mbps PHY Condition .....                                 | 55 |
| 13 Land Patterns .....   | 57 |
| 14 General for Radio Regulatory Certification for LBEE5QD1ZM.....  | 58 |
| 14.1 Application model part number .....                           | 58 |

|   |    |
|---|----|
| 14.2 Label .....  | 58 |
| 14.3 Package Label.....   | 59 |
| 14.4 Country of Origin .....                                      | 60 |
| 15 Radio Regulatory Certification by Country for LBEE5QD1ZM ..... | 60 |
| 15.1 Japan .....  | 60 |
| 15.1.1 Power Levels for Japan.....                                | 61 |
| 15.1.2 Antenna List.....  | 63 |
| 15.1.3 About Notations.....                                       | 63 |
| 15.2 FCC.....   | 64 |
| 15.2.1 Supply Voltage .....                                       | 64 |
| 15.2.2 Power Level for FCC .....                                  | 64 |
| 15.2.3 Theory of Operation for FCC.....                           | 66 |
| 15.2.4 Information to Display in User Manual of Host Device ..... | 67 |
| 15.2.5 Compliance with FCC requirement 15.407(c).....             | 67 |
| 15.2.6 Equipment Installation for FCC .....                       | 68 |
| 15.3 ISED.....  | 69 |
| 15.3.1 Information to Display in Host Device and User Manual..... | 69 |
| 15.3.2 Antenna Installation in End Product.....                   | 70 |
| 15.3.3 Equipment Installation for ISED .....                      | 70 |
| 15.3.4 Power Level for ISED .....                                 | 72 |
| 15.3.5 Theory of Operation for ISED.....                          | 74 |
| 15.4 Europe .....   | 75 |
| 15.4.1 Power Level for Europe.....                                | 75 |
| 15.4.2 Theory of Operation for Europe .....                       | 77 |
| 16 Tape and Reel Packing .....                                    | 78 |
| 16.1 Dimensions of Tape (Plastic Tape).....                       | 78 |
| 16.2 Dimensions of Reel .....                                     | 79 |
| 16.3 Taping Diagrams .....  | 80 |
| 16.4 Leader and Tail Tape .....                                   | 81 |
| 16.5 Packaging (Humidity Proof Packing) .....                     | 82 |
| 17 Notice.....  | 83 |
| 17.1 Storage Conditions .....                                     | 83 |
| 17.2 Handling Conditions .....                                    | 83 |
| 17.3 Standard PCB Design (Land Pattern and Dimensions) .....      | 83 |
| 17.4 Notice for Chip Placer .....                                 | 84 |
| 17.5 Soldering Conditions .....                                   | 84 |
| 17.6 Cleaning.....  | 84 |

|   |    |
|---|----|
| 17.7 Operational Environment Conditions ..... | 85 |
| 18 Preconditions to Use Our Products.....     | 86 |
| Revision History.....                         | 88 |

## About This Guide

Murata's Type 1ZM is a small and high-performance module based on NXP's 88W8987 combo chipset, supporting IEEE 802.11a/b/g/n/ac + Bluetooth 5.1 BR/EDR/LE. This datasheet describes Type 1ZM module in detail.

Please be aware that an important notice concerning availability, standard warranty and use in critical applications of Murata products and disclaimers thereto appears at the end of this specification sheet.

## Audience & Purpose

Intended audience includes any customer looking to integrate this module into their product. In particular, RF, hardware, software, and systems engineers.

## Document Conventions

**Table 1** describes the document conventions.

**Table 1: Document Conventions**

| Conventions                                      | Description   |
|--|---|
|  | <b>Warning Note</b><br>Indicates very important note. Users are strongly recommended to review.   |
|  | <b>Info Note</b><br>Intended for informational purposes. Users should review.   |
|  | <b>Menu Reference</b><br>Indicates menu navigation instructions.<br><b>Example:</b> Insert ➔ Tables ➔ Quick Tables ➔ Save Selection to Gallery  |

| Console input/output or code snippet             | <b>Console I/O or Code Snippet</b><br>This text <b>Style</b> denotes console input/output or a code snippet.  |
| # Console I/O comment<br>// Code snippet comment | <b>Console I/O or Code Snippet Comment</b><br>This text <b>Style</b> denotes a console input/output or code snippet comment. <ul style="list-style-type: none"> <li>• Console I/O comment (preceded by "#") is for informational purposes only and does not denote actual console input/output.</li> <li>• Code Snippet comment (preceded by "//") may exist in the original code.</li> </ul> |

## 1 Scope

This specification is applied to the IEEE 802.11a/b/g/n/ac + Bluetooth 5.1 BR/EDR/LE combo module.

## 2 Key Features

- NXP 88W8987 inside
- Supports IEEE 802.11a/b/g/n/ac specification: Dual band 2.4 GHz and 5 GHz
- SISO with 20 MHz, 40 MHz, and 80 MHz channels
- Up to MCS9 data rates (433 Mbps)
- Supports Bluetooth specification version 5.1
- For supported Bluetooth functions, refer to [Bluetooth SIG site](#)
- WLAN interface: SDIO 3.0
- Bluetooth interface: HCI UART, and PCM
- Temperature Range: - 30 °C to 85 °C
- Dimensions: 10.2 x 9.3 x 1.3 mm
- Weight: 318 mg
- MSL: 3
- Surface-mount type
- RoHS compliant
- Total Fit : 57

## 3 Ordering Information

**Table 2: Ordering Information**

| Ordering Part Number | Description   |
|----------------------|---|
| LBEE5QD1ZM-572       | Module order  |
| LBEE5QD1ZM-SMP       | Sample module order (If module samples are not available through distribution, contact Murata referencing this part number) |
| EAR00364             | Embedded Artists Type 1ZM M.2 EVB (default EVB available through distribution)  |
| LBEE5QD1ZM-EVB       | Murata Type 1ZM M.2 EVB (contact Murata as this is special order item)  |

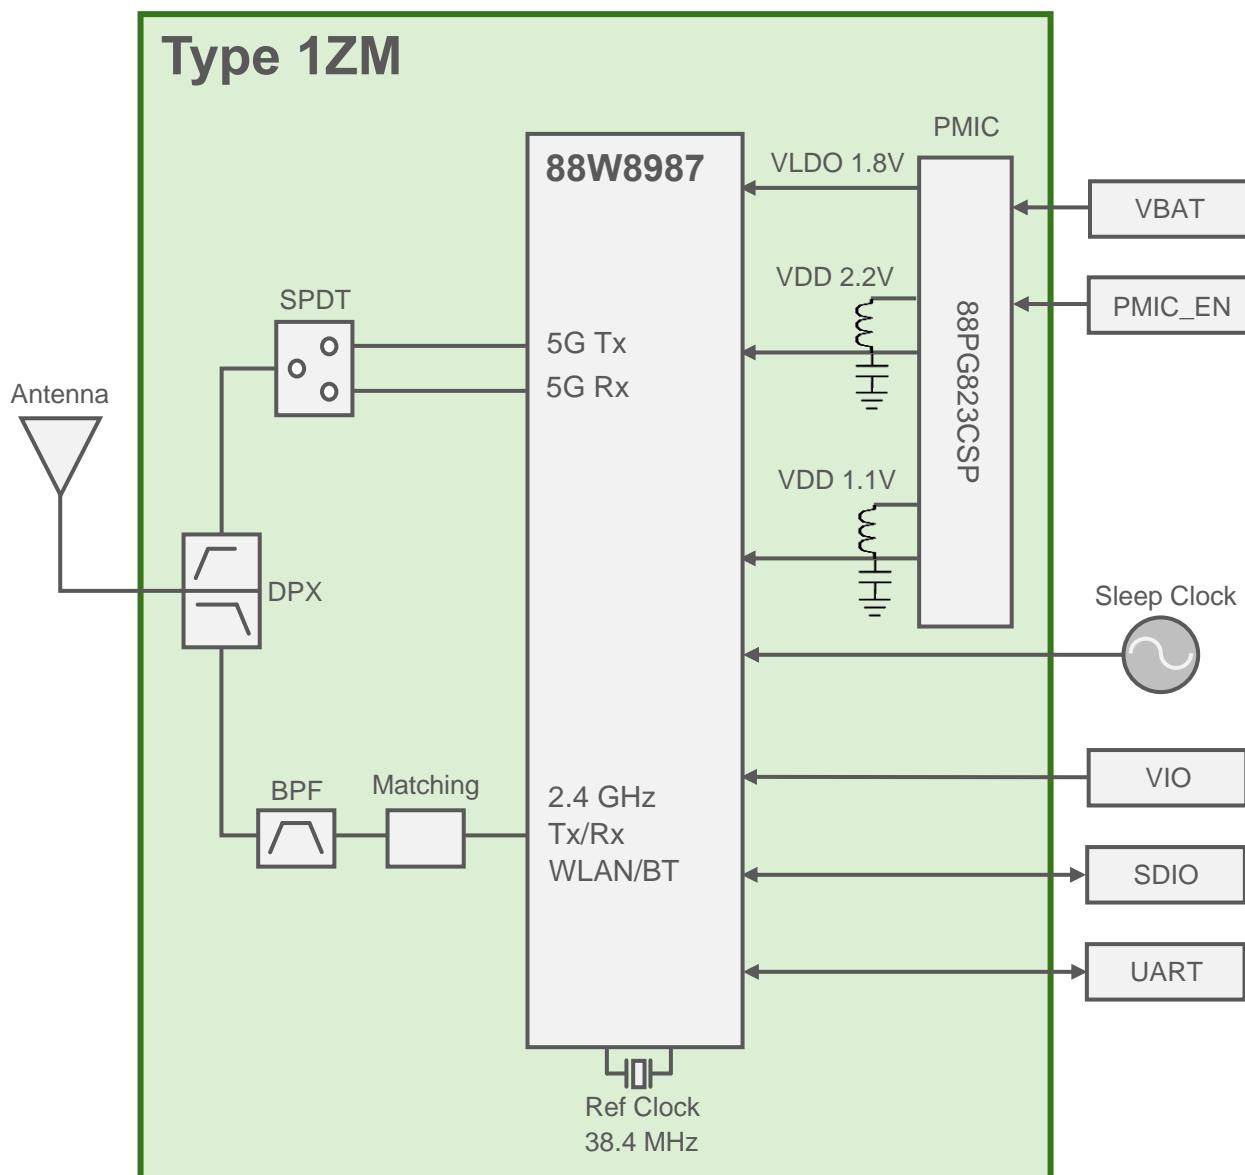

"Type 1ZM" is design name of this module. Design name may be used in certification test report.

## 4 Block Diagram

Figure 1 shows the block diagram of Type 1ZM module.

Figure 1: Block Diagram

## 5 Certification Information

This section has information about radio and Bluetooth certification.

### 5.1 Radio Certification

Transmit output power setting is defined by “txpower\_XX.bin” The transmit power files are hosted at Murata GitHub for [Linux](#) and [FreeRTOS](#). **Table 3** shows the transmit power file required for each region.

**Table 3: Transmit Power Limit Files**

| Country     | ID   | Country Code | Tx Power Limit File |                                     |
|-------------|--|--------------|---------------------|-------------------------------------|
|             |  |              | Linux               | FreeRTOS                            |
| USA (FCC)   | VPYLB1ZM   | US           | txpower_US.bin      | wlan_txpwrlimit_cfg_murata_1ZM_US.h |
| Canada (IC) | 772C-LB1ZM   | CA           | txpower_CA.bin      | wlan_txpwrlimit_cfg_murata_1ZM_CA.h |
| Europe      | EN300328/301893,<br>EN300440 conducted test report is prepared.  | DE           | txpower_EU.bin      | wlan_txpwrlimit_cfg_murata_1ZM_EU.h |
| Japan       | Japanese type certification is prepared.<br> 001-P01598 | JP           | txpower_JP.bin      | wlan_txpwrlimit_cfg_murata_1ZM_JP.h |

Each country code is defined by Murata's db.txt file. Please ask your contact person from Murata.

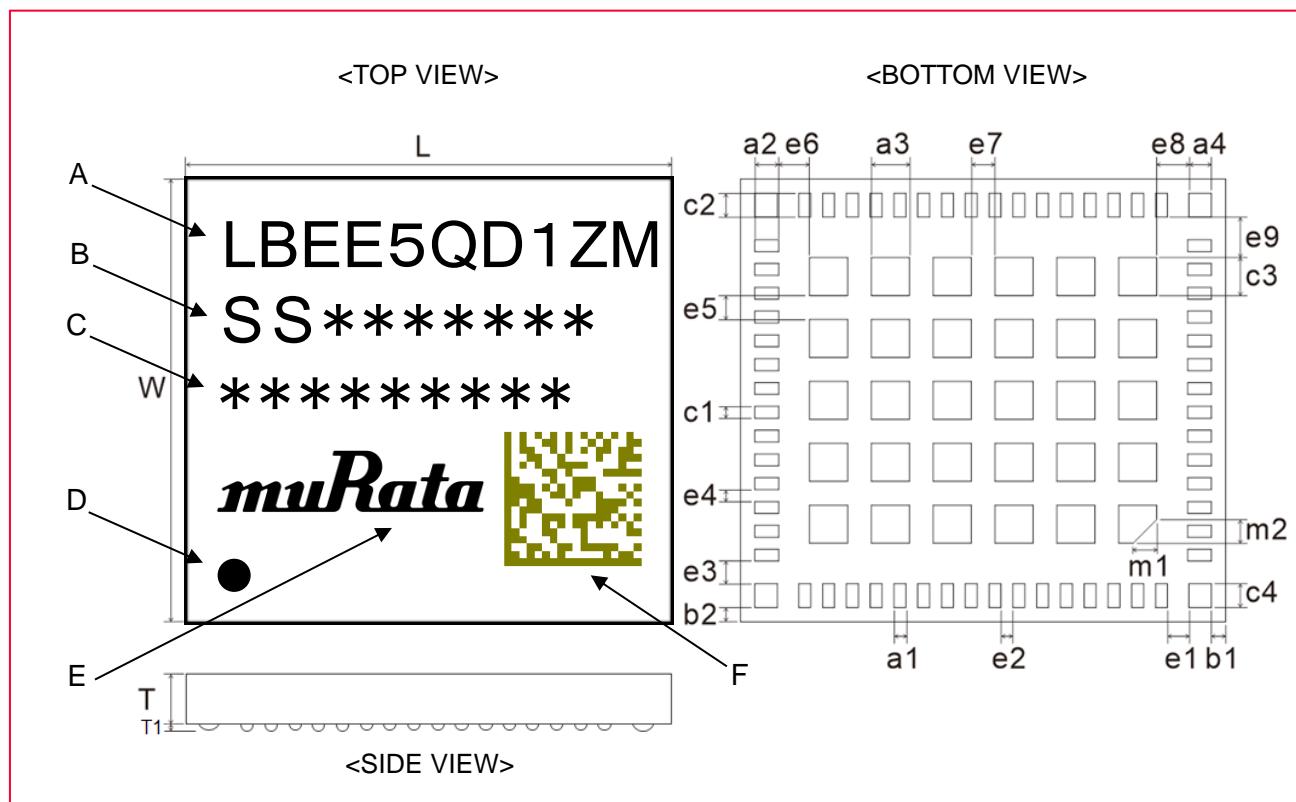

### 5.2 Bluetooth Qualification

- QDID: 142383
- Set Bluetooth Tx Power to Class 1 by using [bt\\_power\\_config\\_1.sh](#).
- For supported Bluetooth functions, refer to [Bluetooth SIG site](#).

## 6 Dimensions, Marking and Terminal Configurations

This section provides information about dimensions, markings, and terminal configuration for Type 1ZM.

**Figure 2: Dimensions, Marking and Terminal Configurations**

**Table 4: Markings**

| Marking | Meaning           |
|---------|-------------------|
| A       | Module Type       |
| B       | Inspection Number |
| C       | Serial Number     |
| D       | Pin 1 Marking     |
| E       | Murata Logo       |
| F       | 2D code           |

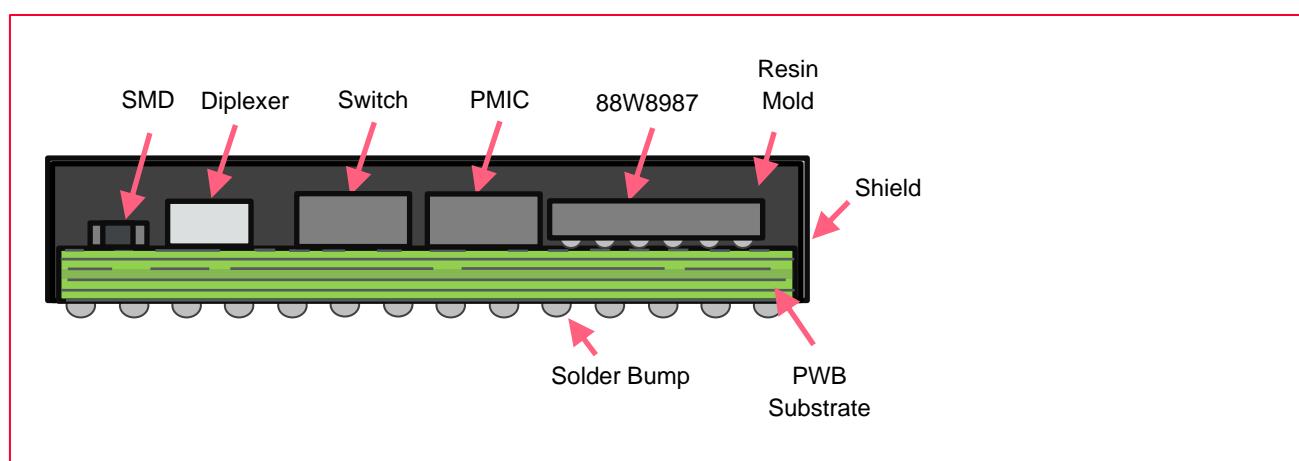

**Table 5: Dimensions**

| Mark | Dimensions (mm) | Mark | Dimensions (mm) | Mark | Dimensions (mm) |
|------|-----------------|------|-----------------|------|-----------------|
| L    | 10.2 +/- 0.2    | W    | 9.3 +/- 0.2     |      |                 |
| T    | 1.30 maximum    | T1   | 0.045 typical   |      |                 |
| a1   | 0.25 +/- 0.1    | a2   | 0.5 +/- 0.1     | a3   | 0.8 +/- 0.1     |
| a4   | 0.475 +/- 0.1   | b1   | 0.3 +/- 0.2     | b2   | 0.3 +/- 0.2     |
| c1   | 0.25 +/- 0.1    | c2   | 0.5 +/- 0.1     | c3   | 0.8 +/- 0.1     |
| c4   | 0.5 +/- 0.1     | e1   | 0.45 +/- 0.1    | e2   | 0.25 +/- 0.1    |
| e3   | 0.475 +/- 0.1   | e4   | 0.25 +/- 0.1    | e5   | 0.5 +/- 0.1     |
| e6   | 0.65 +/- 0.1    | e7   | 0.5 +/- 0.1     | e8   | 0.65 +/- 0.1    |
| e9   | 0.85 +/- 0.1    | m1   | 0.5 +/- 0.1     | m2   | 0.5 +/- 0.1     |

T dimension does not include height of solder bumps.

Unit of Dimensions are in mm.

**Figure 3** shows the structure for 1ZM module.**Figure 3: Structure**

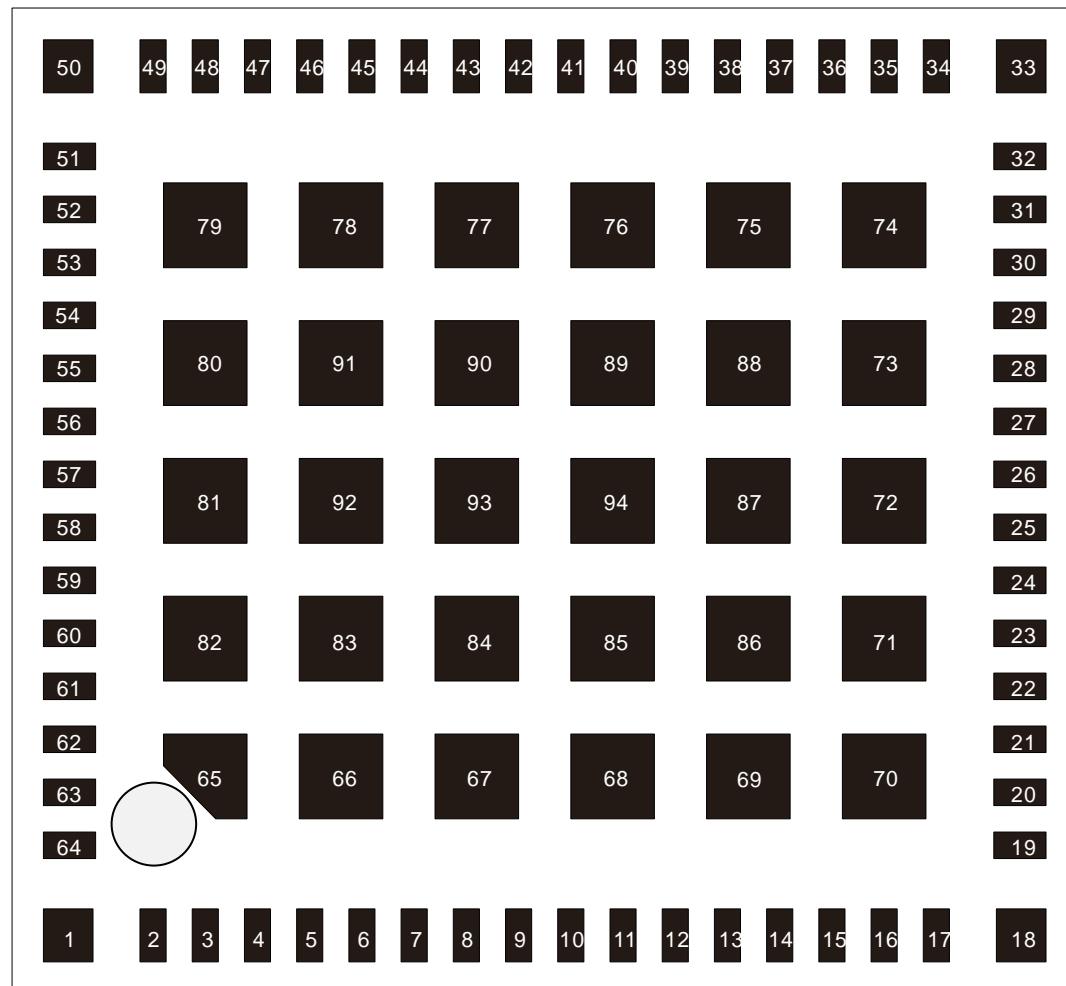

## 7 Module Pin Descriptions

This section has the pin descriptions of Type 1ZM and pin assignments layout descriptions.

### 7.1 Pin Assignments

Type 1ZM pin-assignment (top view) is presented in **Figure 4**.

**Figure 4: Pin Assignments - Top View**

**Table 6** illustrates the terminal configurations.

**Table 6: Terminal Configurations**

| No | Pin name | No | Pin name            | No | Pin name | No | Pin name |
|----|----------|----|---------------------|----|----------|----|----------|
| 1  | GND      | 18 | GND                 | 35 | VBAT     | 52 | GND      |
| 2  | GND      | 19 | GND                 | 36 | GND      | 53 | SD_DAT2  |
| 3  | GPIO19   | 20 | RF                  | 37 | GND      | 54 | SD_DAT3  |
| 4  | GPIO18   | 21 | GND                 | 38 | GPIO15   | 55 | SD_DAT1  |
| 5  | GPIO17   | 22 | GND                 | 39 | GPIO14   | 56 | SD_DAT0  |
| 6  | GPIO16   | 23 | CONFIG_AUTO_REF_DET | 40 | GPIO13   | 57 | SD_CMD   |
| 7  | GPIO7    | 24 | GND                 | 41 | GPIO12   | 58 | GND      |

| No | Pin name       | No | Pin name | No | Pin name | No      | Pin name   |
|----|----------------|----|----------|----|----------|---------|------------|
| 8  | GPIO0          | 25 | GND      | 42 | PMIC_EN  | 59      | SD_CLK     |
| 9  | GPIO6          | 26 | GND      | 43 | GND      | 60      | GND        |
| 10 | GPIO5          | 27 | GPIO1    | 44 | NC(PDn)  | 61      | SLP_CLK_IN |
| 11 | GPIO4          | 28 | GPIO2    | 45 | GND      | 62      | GND        |
| 12 | CONFIG_HOST[0] | 29 | GPIO3    | 46 | GPIO11   | 63      | VIO        |
| 13 | CONFIG_HOST[1] | 30 | GPIO20   | 47 | GPIO10   | 64      | GND        |
| 14 | AVDD18         | 31 | GND      | 48 | GPIO9    | 65 ~ 94 | GND        |
| 15 | GND            | 32 | GND      | 49 | GPIO8    |         |            |
| 16 | GND            | 33 | GND      | 50 | GND      |         |            |
| 17 | GND            | 34 | VBAT     | 51 | GND      |         |            |

## 7.2 Pin Descriptions

**Table 7** lists the pin descriptions of Type 1ZM.

**Table 7: Pin Descriptions**

| No. | Pin name               | Type | Connection to IC pin name       | Description                              |
|-----|------------------------|------|---------------------------------|--|
| 1   | GND                    |      |                                 | Ground                                   |
| 2   | GND                    |      |                                 | Ground                                   |
| 3   | NC (GPIO19)            | I/O  | GPIO[19](88W8987)<br>DVS1(PMIC) | NC                                       |
| 4   | NC (GPIO18)            | I/O  | GPIO[18](88W8987)<br>DVS0(PMIC) | NC                                       |
| 5   | GPIO17                 | I/O  | GPIO[17]                        | Programmable GPIO Pin                    |
| 6   | GPIO16                 | I/O  | GPIO[16]                        | Programmable GPIO Pin                    |
| 7   | GPIO7<br>(BT_PCM_SYNC) | I/O  | GPIO[7]                         | Programmable GPIO Pin                    |
| 8   | GPIO0                  | I/O  | GPIO[0]                         | Programmable GPIO Pin                    |
| 9   | GPIO6<br>(BT_PCM_CLK)  | I/O  | GPIO[6]                         | Programmable GPIO Pin                    |
| 10  | GPIO5<br>(BT_PCM_DOUT) | I/O  | GPIO[5]                         | Programmable GPIO Pin                    |
| 11  | GPIO4<br>(BT_PCM_DIN)  | I/O  | GPIO[4]                         | Programmable GPIO Pin                    |
| 12  | CONFIG_HOST[0]         | I    | CONFIG_HOST[0]                  | Firmware Boot Options                    |

( ) of “pin name” is BSP configuration of NXP iMX8.

## 7.3 Configuration Pins

The pin configurations of Type 1ZM module is shown in **Table 8**.

**Table 8: Configuration Pins**

| CONFIG_HOST[0] | CONFIG_HOST[1] | WLAN | Bluetooth | Remarks   |
|----------------|----------------|------|-----------|---|
| 1              | 1              | SDIO | SDIO      | May not be supported in software. Contact Murata. |
| 0              | 1              | SDIO | UART      | Murata Default                                    |

AVDD18 output can be used to pull-up CONFIG\_HOST pins.

## 7.4 Pin States

Pin state information for the **Table 9** include:

- After firmware is downloaded, the pads (GPIO, Serial interface, RF control) are programmed in functional mode per the functionality of the pins.
- For SDIO, once the command is received from the host, the pads are configured accordingly.
- Pull-up and pull-down are only effective when the pad is in input mode.
- The power-down state shown is the default configuration. Many pads have programmable power-down values, which can be set by firmware.
- Do not need any termination to the open pins in input mode that have an Internal pull-up/pull-down resistor (PU/PD). Do not need any termination to the open pins in output mode.

**Table 9: I/O State Table**

| Pin Name | Supply | No Pad Power State | Reset State | HW State <sup>3</sup>   | PD State <sup>4</sup> | PD Prog <sup>5</sup> | Internal PU/PD | Int'l Pull Value[Ω] <sup>6</sup> |
|----------|--------|--------------------|-------------|-------------------------|-----------------------|----------------------|----------------|----------------------------------|
| GPIO0    | VIO    | tristate           | output      | output                  | drive low             | yes                  | nominal PU     | 90K                              |
| GPIO1    | VIO    | tristate           | input       | input                   | tristate              | yes                  | weak PU        | 800K                             |
| GPIO2    | VIO    | tristate           | input       | drive high <sup>7</sup> | tristate              | yes                  | weak PU        | 800K                             |
| GPIO3    | VIO    | tristate           | input       | drive high <sup>7</sup> | tristate              | yes                  | weak PU        | 800K                             |
| GPIO4    | VIO    | tristate           | input       | input                   | tristate              | yes                  | nominal PU     | 90K                              |
| GPIO5    | VIO    | tristate           | input       | input                   | tristate              | yes                  | weak PU        | 800K                             |

## 7.5 SDIO Pin Descriptions

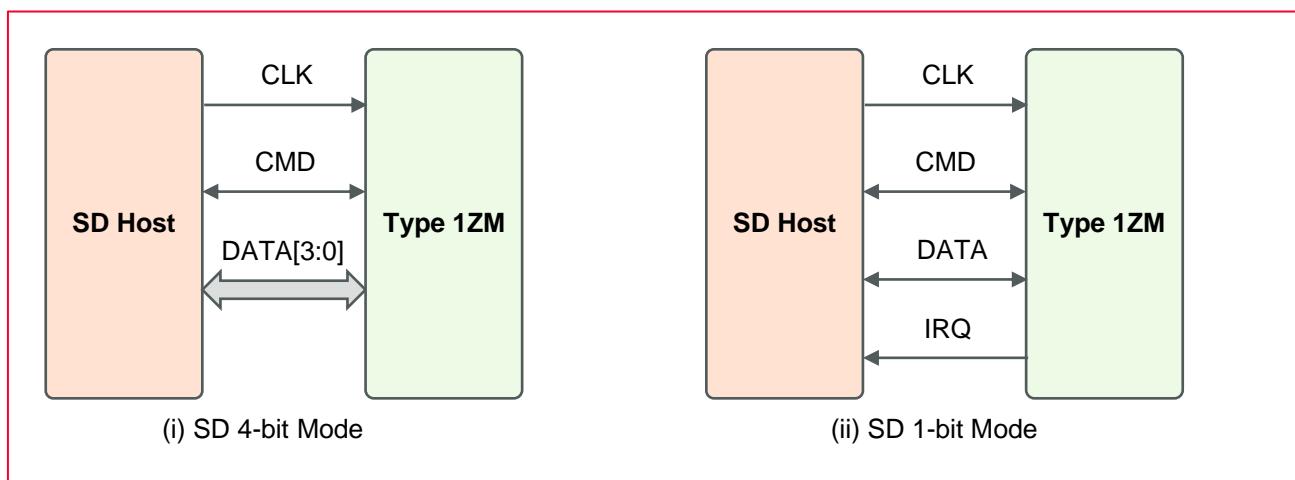

The SDIO pin descriptions of Type 1ZM module is shown in **Table 10**.

**Table 10: SDIO Pin Descriptions**

| No. | Pin Name | (i) SD 4-bit Mode |                        | (ii) SD 1-bit Mode |              |
|-----|----------|-------------------|------------------------|--------------------|--------------|
| 59  | SDIO_CLK | CLK               | Clock                  | CLK                | Clock        |
| 56  | SDIO_D0  | DATA0             | Data line 0            | DATA               | Data line    |
| 55  | SDIO_D1  | DATA1             | Data line 1 /Interrupt | IRQ                | Interrupt    |
| 53  | SDIO_D2  | DATA2             | Data line 2            | NC                 | Not used     |
| 54  | SDIO_D3  | DATA3             | Data line 3            | NC                 | Not used     |
| 57  | SDIO_CMD | CMD               | Command line           | CMD                | Command line |

**Figure 5** shows the SDIO pin diagram for Type 1ZM module.

**Figure 5: SDIO Pins**

## 8 Absolute Maximum Ratings

**Table 11** shows the absolute maximum ratings of Type 1ZM.

**Table 11: Absolute Maximum Ratings**

| Parameter           | Minimum | Maximum | Unit |
|---------------------|---------|---------|------|
| Storage Temperature | -40     | +85     | °C   |
| Supply Voltage      | VBAT    | -0.3    | V    |
|                     | VIO     | -0.3    | V    |

Stresses in excess of the absolute ratings may cause permanent damage. Functional operation is not implied under these conditions. Exposure to absolute ratings for extended periods of time may adversely affect reliability. No damage assuming only one parameter is set at limit at a time with all other parameters are set within operating condition.

## 9 Operating Conditions

### 9.1 Operating Conditions

The operating conditions are shown in **Table 12**.

**Table 12: Operating Conditions**

| Parameter             |      | Minimum | Typical | Maximum | Unit |
|-----------------------|------|---------|---------|---------|------|
| Operating Temperature |      | -30     | 25      | +85     | °C   |
| Supply Voltage        | VBAT | 2.7     |         | 5.5     | V    |
|                       | VIO  | 1.62    | 1.8     | 1.92    | V    |
| IO Current            |      | VIO     | 0.1     | 0.5     | mA   |
| Peak Current          |      | VBAT    | 770     | 950     | mA   |

- Operation beyond the recommended operating conditions is neither recommended nor guaranteed.
- Peak current of VBAT (RF portion) happens during DPD calibration when the firmware is downloaded.

### 9.2 External Sleep Clock Requirements

**Table 13** shows the external sleep clock requirements of Type 1ZM.

**Table 13: External Sleep Clock Requirements**

| Symbol          | Parameter  | Minimum   | Typical | Maximum   | Unit     |
|-----------------|--|-----------|---------|-----------|----------|
| CLK             | Clock frequency range/accuracy<br>CMOS input clock signal type<br>±250 ppm (initial, aging, temperature) |           | 32.768  |           | kHz      |
| V <sub>IH</sub> | Input levels, where VIO=1.8V   | 0.7 * VIO |         | VIO + 0.4 | V        |
| V <sub>IL</sub> |  | -0.4      |         | 0.3 * VIO | V        |
| PN              | Phase Noise Requirement (@ 100 kHz)  |           | -125    |           | dBc/Hz   |
| J <sub>C</sub>  | Cycle jitter   |           | 1.5     |           | ns (RMS) |
| SR              | Slew rate limit (10-90%)   |           |         | 100       | ns       |
| DC              | Duty cycle tolerance   | 20        |         | 80        | %        |

Voltage input level = 1.8V

## 9.3 PMIC\_EN I/O Requirement

**Table 14: PMIC\_EN IO Requirements** shows the PMIC\_EN I/O requirements of Type1ZM.

**Table 14: PMIC\_EN IO Requirements**

| Symbol             | Parameter          | Minimum | Maximum | Unit |
|--------------------|--------------------|---------|---------|------|
| $V_{PMIC\_EN\_IH}$ | Input high voltage | 1.2     |         | V    |
| $V_{PMIC\_EN\_IL}$ | Input low voltage  |         | 0.4     | V    |

## 9.4 Digital I/O Requirements

**Table 15** shows the digital I/O requirements of Type 1ZM.

**Table 15: Digital I/O Requirements**

| Symbol    | Parameter           | Condition | Minimum     | Typical | Maximum     | Unit |
|-----------|---------------------|-----------|-------------|---------|-------------|------|
| $V_{IH}$  | Input high voltage  |           | $0.7 * VIO$ |         | $VIO + 0.4$ | V    |
| $V_{IL}$  | Input low voltage   |           | -0.4        |         | $0.3 * VIO$ | V    |
| $V_{HYS}$ | Input hysteresis    |           | 100         |         |             | mV   |
| $V_{OH}$  | Output high voltage |           | $VIO - 0.4$ |         |             | V    |
| $V_{OL}$  | Output low voltage  |           |             |         | 0.4         | V    |

## 9.5 Package Thermal Conditions

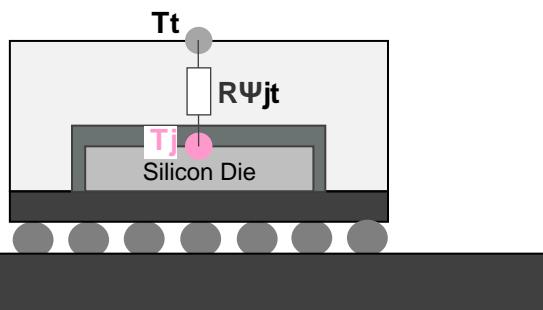

The package thermal conditions as shown in **Figure 6** are as below:

- $R\psi_{jt}$ : 2.76 °C/W
- $R\psi_{jt} = (T_j - T_t)/P$

$T_j$ : Junction temperature (°C),  $T_t$ : Top temperature (°C),  $P$ : Total Power Consumption (W)

**Figure 6: Package Thermal Conditions**

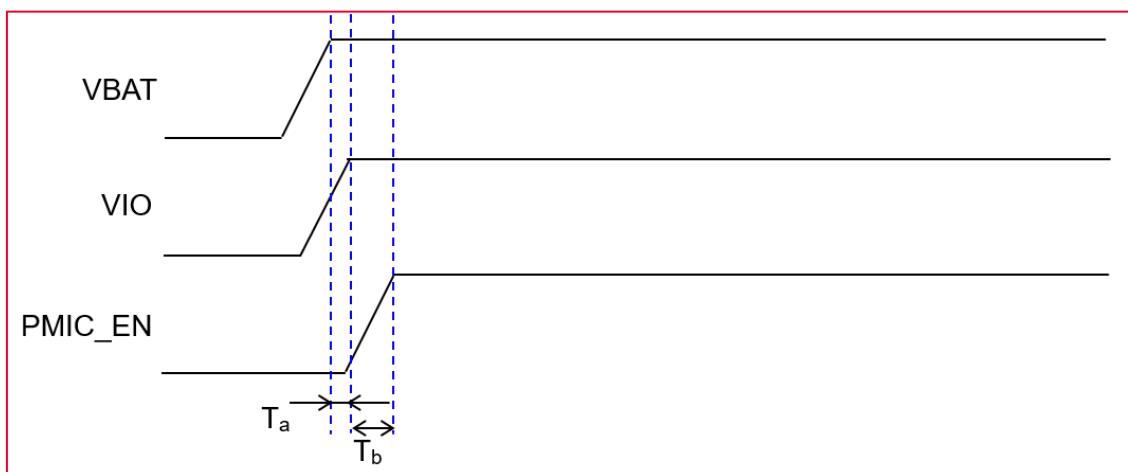

## 10 Power Sequence

This section describes the power-on and power-off sequences along with their parameters.

### 10.1 Power-On Sequence

- VBAT and VIO must be good (90%) at the same time or before assert PMIC\_EN (= 0 to 1).
- Ramp-up time of VIO must be < 100 ms.

**Figure 7: Power-On Sequence Graph**

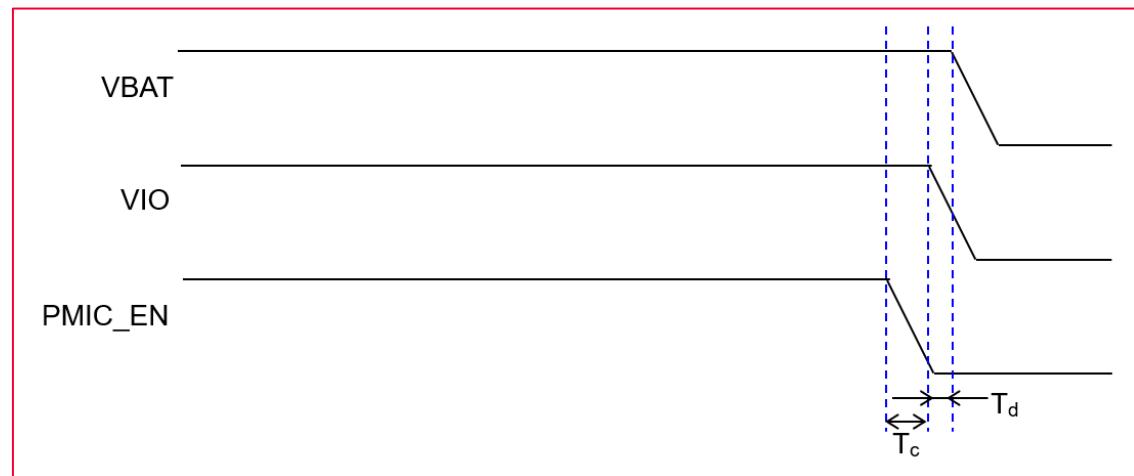

**Table 16: Power-On Sequence Parameters**

| Symbol         | Parameter           | Minimum | Typical | Maximum | Unit |
|----------------|---------------------|---------|---------|---------|------|
| T <sub>a</sub> | VBAT to VIO time    | 0       |         |         | ms   |
| T <sub>b</sub> | VIO to PMIC_EN time | 0       |         |         | ms   |

## 10.2 Power-Off Sequence

- VBAT and VIO must be down at the same time or before de-assert PMIC\_EN (= 1 to 0).
- Ramp-down time of VIO must be < 100 ms.

**Figure 8: Power-Off Sequence Graph****Table 17: Power-Off Sequence Parameters**

| Symbol         | Parameter           | Minimum | Typical | Maximum | Unit |
|----------------|---------------------|---------|---------|---------|------|
| T <sub>c</sub> | PMIC_EN to VIO time | 0       |         |         | ms   |
| T <sub>d</sub> | VIO to VBAT time    | 0       |         |         | ms   |

## 11 Interface Timing

This section describes the interface timings; SDIO and UART timings and their speed modes, related parameters, and graphs.

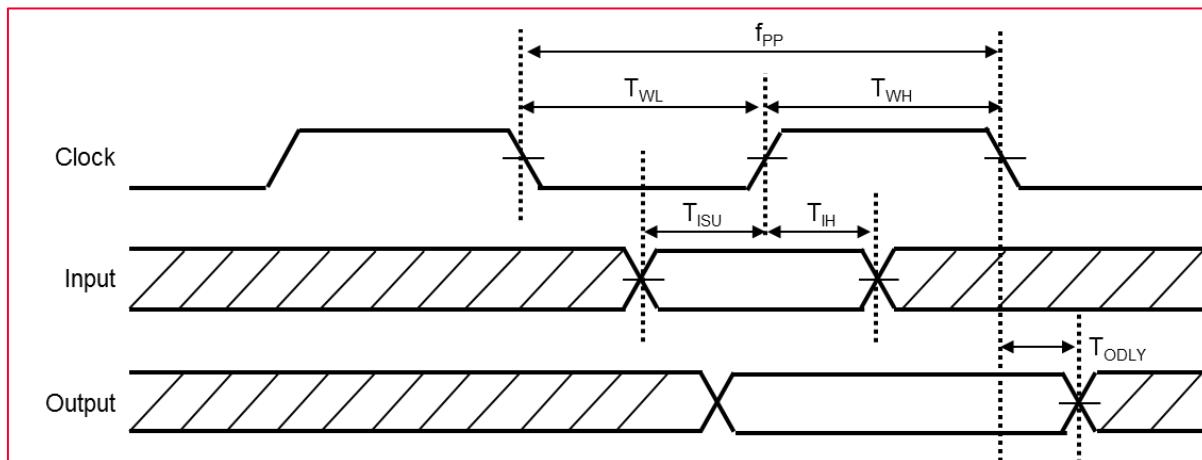

### 11.1 SDIO Timing

This section describes the SDIO timing for different modes.

#### 11.1.1 Default Speed Mode

The default speed mode is shown in **Figure 9**.

**Figure 9: SDIO Protocol Timing Diagram - Default Speed Mode**

#### 11.1.2 High Speed Mode

The high-speed mode is shown in **Figure 10**.

**Figure 10: SDIO Protocol Timing Diagram - High Speed Mode**

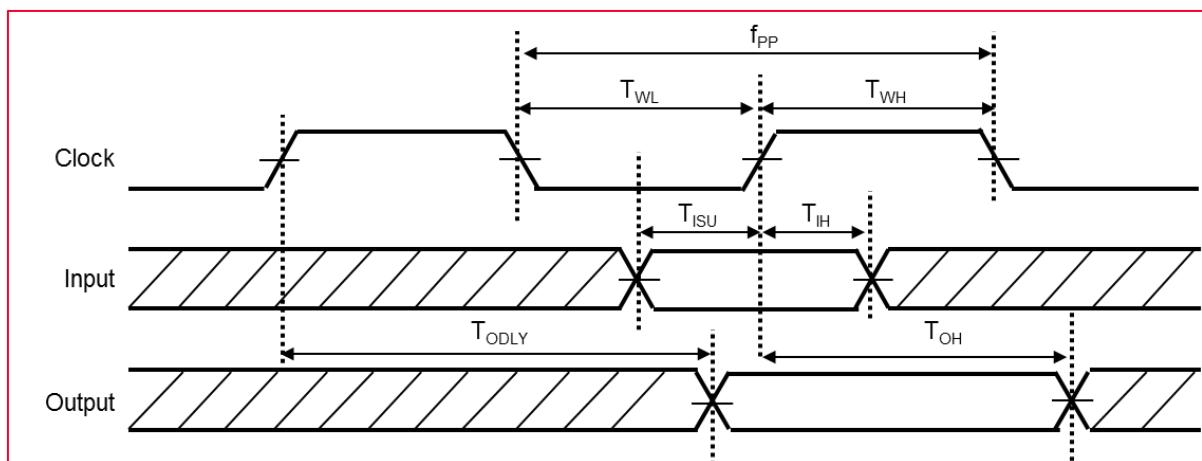

Table 18: SDIO Protocol Timing Parameters - Default Speed, High-Speed Modes

| Symbol     | Parameter           | Condition  | Minimum | Typical | Maximum | Unit |
|------------|---------------------|------------|---------|---------|---------|------|
| $f_{PP}$   | Clock frequency     | Normal     | 0       |         | 25      | MHz  |
|            |                     | High-speed | 0       |         | 50      | MHz  |
| $T_{WL}$   | Clock low time      | Normal     | 10      |         |         | ns   |
|            |                     | High-speed | 7       |         |         | ns   |
| $T_{HW}$   | Clock high time     | Normal     | 10      |         |         | ns   |
|            |                     | High-speed | 7       |         |         | ns   |
| $T_{ISU}$  | Input setup time    | Normal     | 5       |         |         | ns   |
|            |                     | High-speed | 6       |         |         | ns   |
| $T_{IH}$   | Input hold time     | Normal     | 5       |         |         | ns   |
|            |                     | High-speed | 2       |         |         | ns   |
| $T_{OLDY}$ | Output delay time   | Normal     |         |         | 14      | ns   |
|            | CL ≤ 40 pF (1 card) | High-speed |         |         | 14      | ns   |
| $T_{OH}$   | Output hold time    | High-speed | 2.5     |         |         | ns   |

### 11.1.3 SDR12, SDR25, SDR50 Modes (up to 100 MHz)

The SDIO protocol timing diagram for SDR12, SDR25, SDR50 modes are shown in **Figure 11**.

Figure 11: SDIO Protocol Timing Diagram - SDR12, SDR25, SDR50 Mode

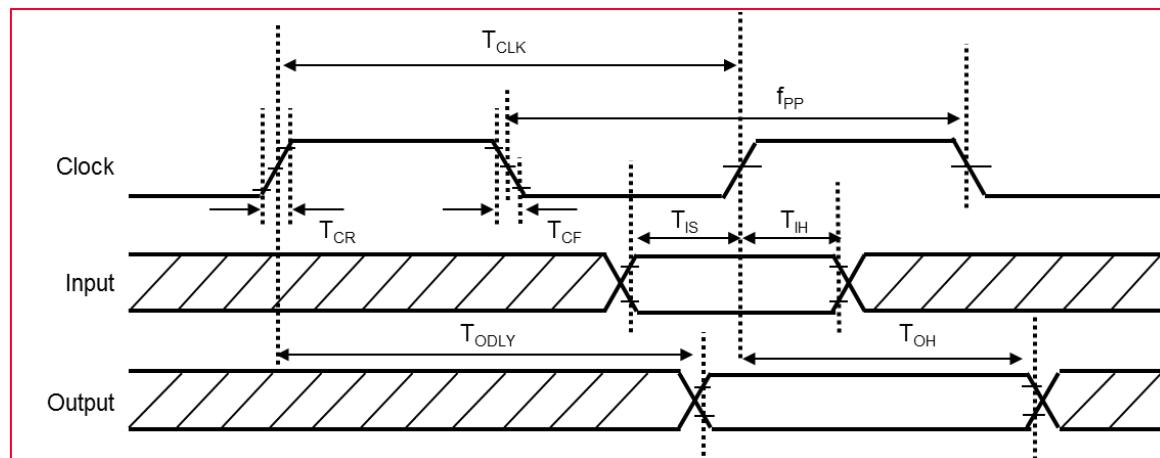

Table 19: SDIO Protocol Timing Parameters - SDR12, SDR25, SDR50 Modes

| Symbol    | Parameter        | Condition   | Minimum | Typical | Maximum | Unit |
|-----------|------------------|-------------|---------|---------|---------|------|
| $f_{PP}$  | Clock frequency  | SDR12/25/50 | 25      |         | 100     | MHz  |
| $T_{IS}$  | Input Setup time | SDR12/25/50 | 3       |         |         | ns   |
| $T_{IH}$  | Input hold time  | SDR12/25/50 | 0.8     |         |         | ns   |
| $T_{CLK}$ | Clock time       | SDR12/25/50 | 10      |         | 40      | ns   |

| Symbol           | Parameter  | Condition   | Minimum | Typical | Maximum       | Unit |
|------------------|--|-------------|---------|---------|---------------|------|
| $T_{CR}, T_{CF}$ | Rise time, fall time   | SDR12/25/50 |         |         | $0.2*T_{CLK}$ | ns   |
| $T_{ODLY}$       | Output delay time<br>$T_{CR}, T_{CF} < 2$ ns (maximum)<br>at 100 MHz<br>$C_{CARD} = 10$ pF | SDR12/25/50 |         |         | 7.5           | ns   |
| $T_{OH}$         | Output hold time   | SDR12/25/50 | 1.5     |         |               | ns   |

### 11.1.4 SDR104 Mode (208 MHz)

Figure 12 shows the SDIO protocol timing diagram SDR104 Mode (208 MHz).

Figure 12: SDIO Protocol Timing Diagram - SDR104 Mode

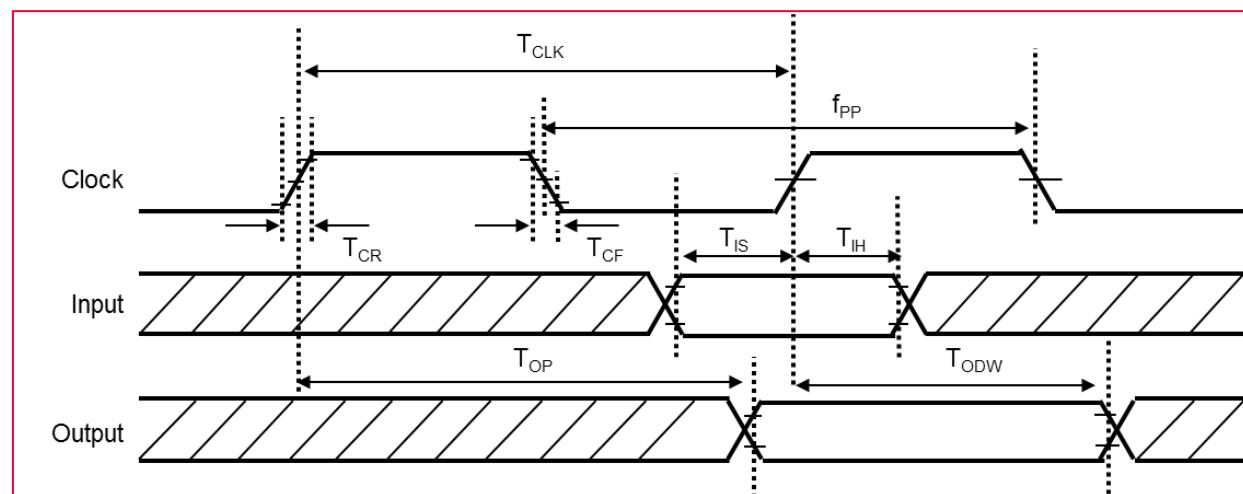

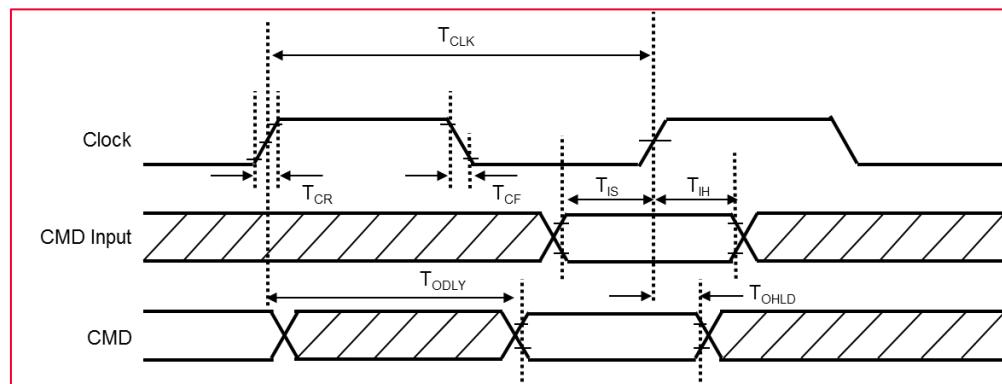

Table 20: SDIO Protocol Timing Parameters - SDR104 Mode

| Symbol           | Parameter  | Condition | Minimum | Typical | Maximum       | Unit |
|------------------|--|-----------|---------|---------|---------------|------|
| $f_{PP}$         | Clock frequency  | SDR104    | 0       |         | 208           | MHz  |
| $T_{IS}$         | Input Setup time   | SDR104    | 1.4     |         |               | ns   |
| $T_{IH}$         | Input hold time  | SDR104    | 0.8     |         |               | ns   |
| $T_{CLK}$        | Clock time   | SDR104    | 4.8     |         |               | ns   |
| $T_{CR}, T_{CF}$ | Rise time, fall time<br>$T_{CR}, T_{CF} < 0.96$ ns(maximum) at 208 MHz<br>$C_{CARD} = 10$ pF | SDR104    |         |         | $0.2*T_{CLK}$ | ns   |
| $T_{OP}$         | Card output phase  | SDR104    | 0       |         | 10            | ns   |
| $T_{ODW}$        | Output timing of variable data window  | SDR104    | 2.88    |         |               | ns   |

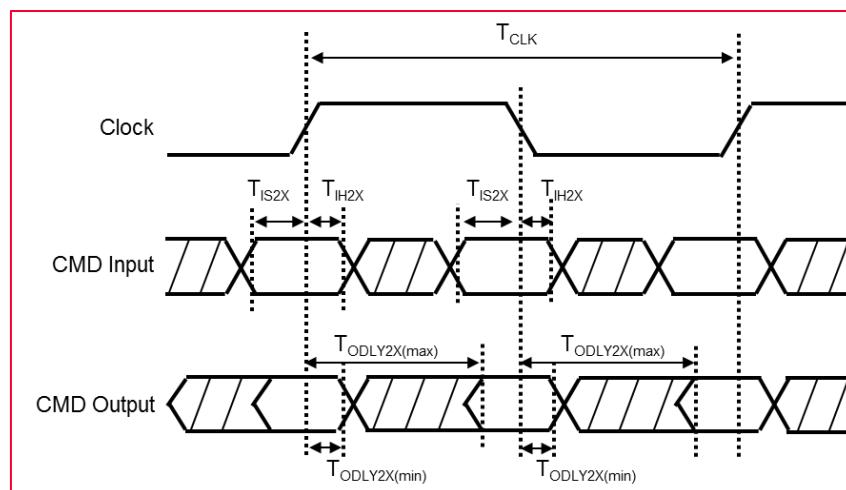

## 11.1.5 DDR50 Mode (50 MHz)

**Figure 13** shows the SDIO CMD timing diagram and **Figure 14** shows the SDIO DATA timing diagram for DDR50 Mode (50 MHz).

**Figure 13: SDIO CMD Timing Diagram - DDR50 Mode**

**Figure 14: SDIO DATA Timing Diagram - DDR50 Mode**

**Table 21: SDIO Protocol Timing Parameters - DDR50 Mode**

| Symbol   | Parameter  | Condition | Minimum | Typical | Maximum         | Unit |
|--|--|-----------|---------|---------|-----------------|------|
| <b>Clock</b>                                       |  |           |         |         |                 |      |
| $T_{CLK}$  | Clock time<br>50 MHz (maximum) between rising edge   | DDR50     | 20      |         |                 | MHz  |
| $T_{CR}, T_{CF}$                                   | Rise time, fall time<br>$T_{CR}, T_{CF} < 4.00$ ns (maximum) at 50 MHz<br>$C_{CARD} = 10$ pF | DDR50     |         |         | $0.2 * T_{CLK}$ | ns   |
| Clock Duty   | -  | DDR50     | 45      |         | 55              | %    |
| <b>CMD input (referenced to clock rising edge)</b> |  |           |         |         |                 |      |
| $T_{IS}$   | Input Setup time   | DDR50     | 6       |         |                 | ns   |
| $T_{IH}$   | Input hold time  | DDR50     | 0.8     |         |                 | ns   |

| Symbol  | Parameter  | Condition | Minimum | Typical | Maximum | Unit |
|---|--|-----------|---------|---------|---------|------|
| <b>CMD Output (referenced to clock rising edge)</b>                   |  |           |         |         |         |      |
| T <sub>ODLY</sub>   | Output delay time during data transfer mode<br>$C_L \leq 30 \text{ F}$ (1 card)  | DDR50     |         |         | 13.7    | ns   |
| T <sub>OHLD</sub>   | Output hold time<br>$C_L \geq 15 \text{ F}$ (1 card)                             | DDR50     | 1.5     |         |         | ns   |
| <b>DAT[3:0] Input (referenced to clock rising and falling edges)</b>  |  |           |         |         |         |      |
| T <sub>IS2x</sub>   | Input setup time<br>$C_{CARD} \leq 10 \text{ pF}$ (1 card)                       | DDR50     | 3       |         |         | ns   |
| T <sub>IH2x</sub>   | Input hold time<br>$C_{CARD} \leq 10 \text{ pF}$ (1 card)                        | DDR50     | 0.8     |         |         | ns   |
| <b>DAT[3:0] Output (referenced to clock rising and falling edges)</b> |  |           |         |         |         |      |
| T <sub>ODLY2x (max)</sub>   | Output delay time during data transfer mode<br>$C_L \leq 25 \text{ pF}$ (1 card) | DDR50     |         |         | 7.0     | ns   |
| T <sub>ODLY2x (min)</sub>   | Output hold time<br>$C_L \geq 15 \text{ pF}$ (1 card)                            | DDR50     | 1.5     |         |         | ns   |

## 11.2 High Speed UART Specifications

The default baud rate is 115200 bps. Baud rate is configurable by the host stack.

Figure 15: High Speed UART Timing Diagram

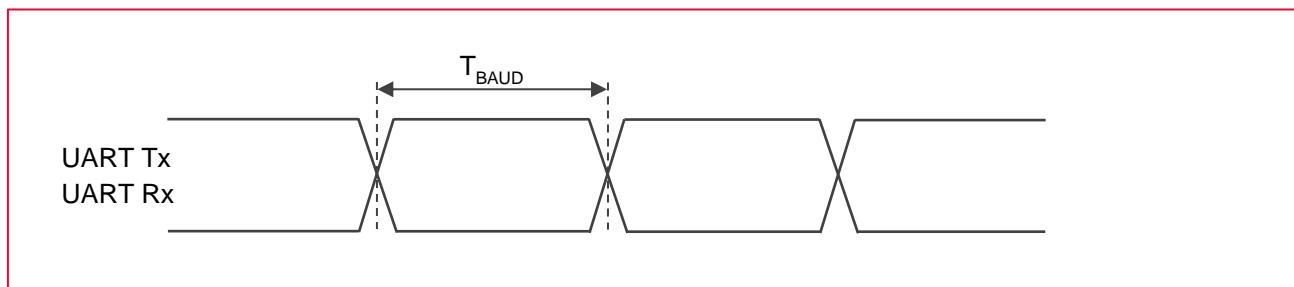

Table 22: High Speed UART Timing Parameters

| Symbol            | Parameter | Condition | Minimum | Typical | Maximum | Unit |
|-------------------|-----------|-----------|---------|---------|---------|------|
| T <sub>BAUD</sub> | Baud rate | 38.4 MHz  | 250     |         |         | ns   |

The acceptable deviation from the UART Rx target baud rate is  $\pm 3\%$ .

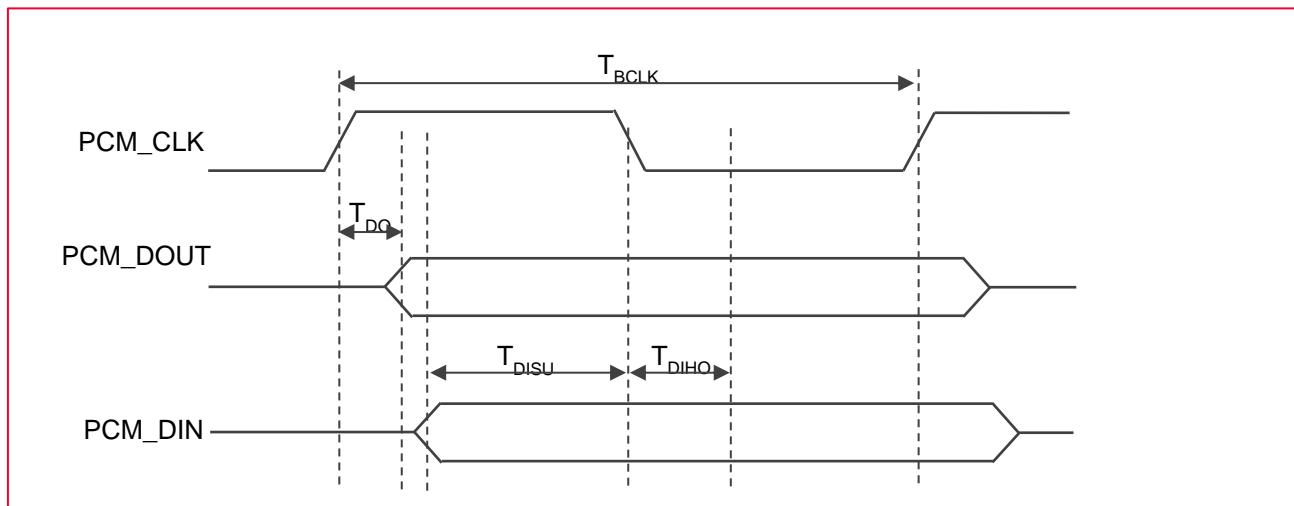

## 11.3 Bluetooth PCM Timing

This section describes the PCM timings: PCM\_Sync signal - Master mode, PCM\_Sync signal - Slave mode along with their data signals and parameters.

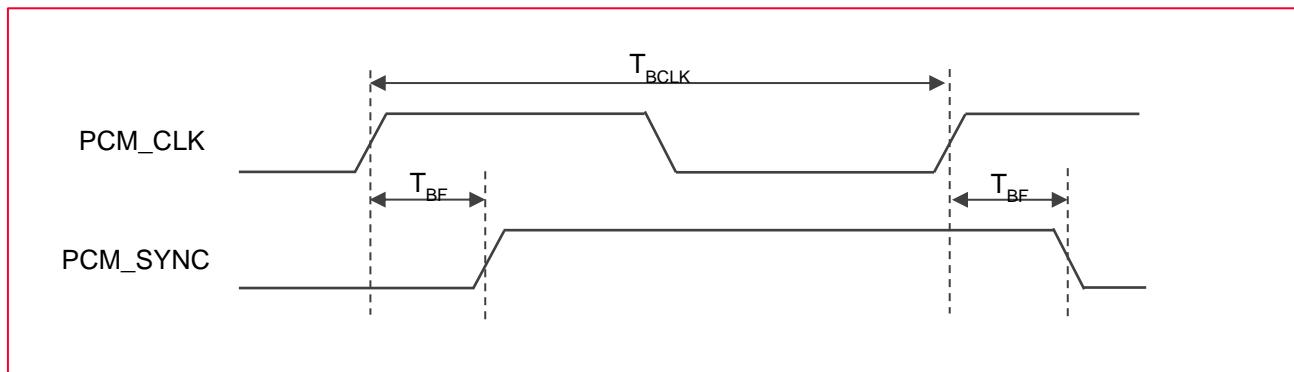

### 11.3.1 Master Mode

**Figure 16** and **Figure 17** shows the timing diagram of master mode for data and PCM\_SYNC signals.

**Figure 16: Bluetooth Data Signal - Master Mode**

**Figure 17: Bluetooth PCM\_SYNC signal - Master Mode**

**Table 23** lists information about the data and PCM\_SYNC signals in master mode.

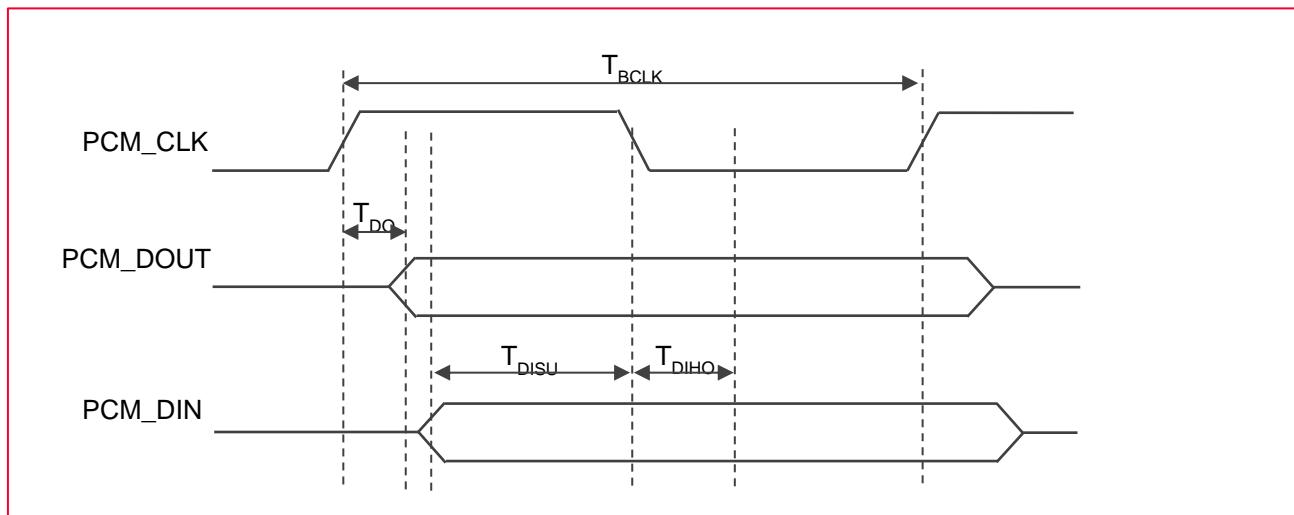

**Table 23: Symbol Definition for Data Signal & PCM\_SYNC Signal - Master Mode**

| Symbol               | Parameter  | Condition | Minimum | Typical | Maximum | Unit |
|----------------------|--|-----------|---------|---------|---------|------|
| $T_{BCLK}$           | Bit clock frequency                                    |           |         | 2/2.048 |         | MHz  |
| Duty Cycle $BCLK$    | Bit clock duty cycle                                   |           | 0.4     | 0.5     | 0.6     |      |
| $T_{BCLK}$ rise/fall | PCM_CLK rise/fall time                                 |           |         | 3       |         | ns   |
| $T_{DO}$             | Delay from PCM_CLK rising edge to PCM_DOUT rising edge |           |         |         | 15      | ns   |
| $T_{DISU}$           | Setup time for PCM_DIN before PCM_CLK falling edge     |           | 20      |         |         | ns   |
| $T_{DIHO}$           | Hold time for PCM_DIN after PCM_CLK falling edge       |           | 15      |         |         | ns   |
| $T_{BF}$             | Delay from PCM_CLK rising edge to PCM_SYNC rising edge |           |         |         | 15      | ns   |

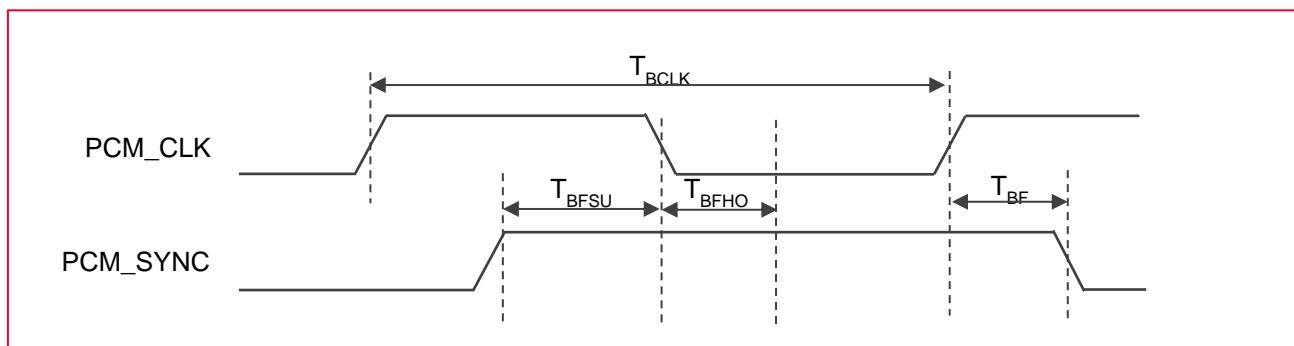

## 11.3.2 Slave Mode

**Figure 18** and **Figure 19** shows the timing diagram of slave mode for data and PCM\_SYNC signals. **Table 24** lists information about the data and PCM\_SYNC signals in slave mode.

**Figure 18: Bluetooth Data Signal - Slave Mode**

**Figure 19: Bluetooth PCM\_SYNC signal - Slave Mode**

**Table 24: Symbol Definition for Data Signal & PCM\_SYNC Signal - Slave Mode**

| Symbol               | Parameter  | Condition | Minimum | Typical | Maximum | Unit |
|----------------------|--|-----------|---------|---------|---------|------|
| $T_{BCLK}$           | Bit clock frequency                                    |           |         | 2/2.048 |         | MHz  |
| Duty Cycle $_{BCLK}$ | Bit clock duty cycle                                   |           | 0.4     | 0.5     | 0.6     |      |
| $T_{BCLK}$ rise/fall | PCM_CLK rise/fall time                                 |           |         | 3       |         | ns   |
| $T_{DO}$             | Delay from PCM_CLK rising edge to PCM_DOUT rising edge |           |         |         | 30      | ns   |
| $T_{DISU}$           | Setup time for PCM_DIN before PCM_CLK falling edge     |           | 15      |         |         | ns   |
| $T_{DIHO}$           | Hold time for PCM_DIN after PCM_CLK falling edge       |           | 10      |         |         | ns   |
| $T_{BFSU}$           | Setup time for PCM_SYNC before PCM_CLK falling edge    |           | 15      |         |         | ns   |
| $T_{BFHO}$           | Hold time for PCM_SYNC after PCM_CLK falling edge      |           | 10      |         |         | ns   |

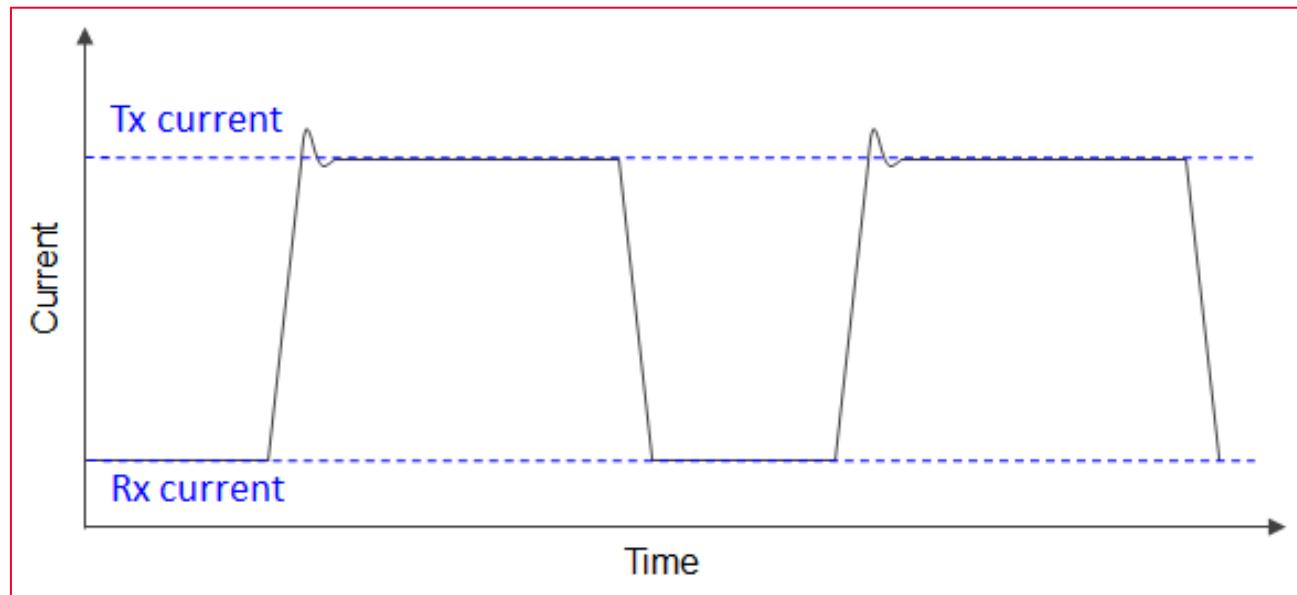

## 12 DC/RF Characteristics

All DC/RF characteristics are defined by following files as shown with file names in **Table 25**. **Figure 20** shows the burst current definition for Type 1ZM module.

**Table 25: DC/RF Characteristics and Files**

| Characteristic        | Filenames  |
|-----------------------|--|
| WLAN Tx Power         | txpower_US.bin, txpower_CA.bin, txpower_EU.bin, txpower_JP.bin |
| WLAN Regulatory Limit | db.txt   |
| Energy Detect         | ed_mac.bin   |
| Bluetooth Power       | bt_power_config_1.sh (Class 1)                                 |

### 12.1 DC/RF Characteristics for IEEE 802.11b - 2.4 GHz

**Table 26: Characteristics Values for IEEE 802.11b - 2.4 GHz**

| Items             | Contents           |
|-------------------|--------------------|
| Specification     | IEEE 802.11b       |
| Mode              | DSSS / CCK         |
| Channel Frequency | 2412 to 2472 MHz   |
| Data rate         | 1, 2, 5.5, 11 Mbps |

## 12.1.1 High-Rate Condition for IEEE 802.11b - 2.4 GHz

**Conditions:** 25 °C, VBAT = 3.3V, VIO = 1.8V, Output power setting = 17 dBm at module pad, 11 Mbps mode

**Table 27: High-Rate Condition for IEEE 802.11b - 2.4 GHz**

| Items                                 | Contents |         |         |      |
|---------------------------------------|----------|---------|---------|------|
| DC Characteristics                    | Minimum  | Typical | Maximum | Unit |
| DC current                            |          |         |         |      |
| • Tx mode                             |          | 384     | 535     | mA   |
| • Rx mode                             |          | 64      | 76      | mA   |
| Tx Characteristics                    | Minimum  | Typical | Maximum | Unit |
| Output Power                          | 15.0     | 17.0    | 19.0    | dBm  |
| Spectrum Mask Margin                  |          |         |         |      |
| • 1st side lobes                      | 0        |         |         | dB   |
| • 2nd side lobes                      | 0        |         |         | dB   |
| Power-on/off ramp                     |          |         | 2.0     | µs   |
| RF Carrier Suppression                | 15       |         |         | dB   |
| Modulation Accuracy                   |          |         | 35      | %    |
| Frequency Tolerance                   | -20      |         | 20      | ppm  |
| Spurious Emissions                    |          |         |         |      |
| • 30 - 47 MHz (BW = 100 kHz)          |          |         | -36     | dBm  |
| • 47 - 74 MHz (BW = 100 kHz)          |          |         | -54     | dBm  |
| • 74 - 87.5 MHz (BW = 100 kHz)        |          |         | -36     | dBm  |
| • 87.5 - 118 MHz (BW = 100 kHz)       |          |         | -54     | dBm  |
| • 118 - 174 MHz (BW = 100 kHz)        |          |         | -36     | dBm  |
| • 174 - 230 MHz (BW = 100 kHz)        |          |         | -54     | dBm  |
| • 230 - 470 MHz (BW = 100 kHz)        |          |         | -36     | dBm  |
| • 470 - 862 MHz (BW = 100 kHz)        |          |         | -54     | dBm  |
| • 862 - 1000 MHz (BW = 100 kHz)       |          |         | -36     | dBm  |
| • 1000 - 12750 MHz (BW = 1 MHz)       |          |         | -30     | dBm  |
| Rx Characteristics                    | Minimum  | Typical | Maximum | Unit |
| Minimum Input Level (FER ≤ 8%)        |          |         | -76     | dBm  |
| Maximum Input Level (FER ≤ 8%)        | -10      |         |         | dBm  |
| Adjacent Channel Rejection (FER < 8%) | 35       |         |         | dB   |

## 12.1.2 Low-Rate Condition for IEEE 802.11b - 2.4 GHz

**Conditions:** 25 °C, VBAT = 3.3V, VIO = 1.8V, Output power setting = 17 dBm at module pad, 1 Mbps mode

**Table 28: Low-Rate Condition for IEEE 802.11b - 2.4 GHz**

| Items                                 | Contents |         |         |      |

| Rx Characteristics                    | Minimum  | Typical | Maximum | Unit |
| Minimum Input Level (FER ≤ 8%)        |          |         | -80     | dBm  |
| Maximum Input Level (FER ≤ 8%)        | -4       |         |         | dBm  |
| Adjacent Channel Rejection (FER < 8%) | 35       |         |         | dB   |

## 12.2 DC/RF Characteristics for IEEE 802.11g - 2.4 GHz

**Table 29: Characteristics values for IEEE 802.11g - 2.4 GHz**

| Items             | Contents                          |
|-------------------|-----------------------------------|
| Specification     | IEEE 802.11g                      |
| Mode              | OFDM                              |
| Channel Frequency | 2412 to 2472 MHz                  |
| Data rate         | 6, 9, 12, 18, 24, 36, 48, 54 Mbps |

### 12.2.1 High-Rate Condition for IEEE 802.11g - 2.4 GHz

**Conditions:** 25 °C, VBAT = 3.3V, VIO = 1.8V, Output power setting = 16 dBm at module pad, 54 Mbps mode

**Table 30: High-Rate Condition for IEEE 802.11g - 2.4 GHz**

| Items   | Contents |         |         |      |
|---|----------|---------|---------|------|
| DC Characteristics                              | Minimum  | Typical | Maximum | Unit |
| DC current                                      |          |         |         |      |
| • Tx mode                                       |          | 336     | 458     | mA   |
| • Rx mode                                       |          | 64      | 76      | mA   |
| Tx Characteristics                              | Minimum  | Typical | Maximum | Unit |
| Output Power                                    | 15.0     | 16.0    | 18.0    | dBm  |
| Spectrum Mask Margin                            |          |         |         |      |
| • 9 MHz to 11 MHz (0 ~ -20 dB <sub>r</sub> )    | 0        |         |         | dB   |
| • 11 MHz to 20 MHz (-20 ~ -28 dB <sub>r</sub> ) | 0        |         |         | dB   |
| • 20 MHz to 30 MHz (-28 ~ -40 dB <sub>r</sub> ) | 0        |         |         | dB   |
| • 30 MHz to 33 MHz (-40 dB <sub>r</sub> )       | 0        |         |         | dB   |
| Constellation Error (EVM)                       |          |         | -25     | dB   |
| Frequency Tolerance                             | -20      |         | 20      | ppm  |
| Spurious Emissions                              |          |         |         |      |
| • 30 - 47 MHz (BW = 100 kHz)                    |          |         | -36     | dBm  |
| • 47 - 74 MHz (BW = 100 kHz)                    |          |         | -54     | dBm  |
| • 74 - 87.5 MHz (BW = 100 kHz)                  |          |         | -36     | dBm  |
| • 87.5 - 118 MHz (BW = 100 kHz)                 |          |         | -54     | dBm  |
| • 118 - 174 MHz (BW = 100 kHz)                  |          |         | -36     | dBm  |
| • 174 - 230 MHz (BW = 100 kHz)                  |          |         | -54     | dBm  |
| • 230 - 470 MHz (BW = 100 kHz)                  |          |         | -36     | dBm  |
| • 470 - 862 MHz (BW = 100 kHz)                  |          |         | -54     | dBm  |
| • 862 - 1000 MHz (BW = 100 kHz)                 |          |         | -36     | dBm  |
| • 1000 - 12750 MHz (BW = 1 MHz)                 |          |         | -30     | dBm  |
| Rx Characteristics                              | Minimum  | Typical | Maximum | Unit |
| Minimum Input Level (PER < 10%)                 |          |         | -65     | dBm  |
| Maximum Input Level (PER < 10%)                 | -20      |         |         | dBm  |
| Adjacent Channel Rejection (PER < 10%)          | -1       |         |         | dB   |

## 12.2.2 Low-Rate Condition for IEEE 802.11g - 2.4 GHz

**Conditions:** 25 °C, VBAT = 3.3V, VIO = 1.8V, Output power setting = 17 dBm at module pad, 6 Mbps mode

**Table 31: Low-Rate Condition for IEEE 802.11g - 2.4 GHz**

| Items   | Contents |         |         |      |
|---|----------|---------|---------|------|

| • 862 - 1000 MHz (BW = 100 kHz)                 |          |         | -36     | dBm  |
| • 1000 - 12750 MHz (BW = 1 MHz)                 |          |         | -30     | dBm  |
| Rx Characteristics                              | Minimum  | Typical | Maximum | Unit |
| Minimum Input Level (PER < 10%)                 |          |         | -82     | dBm  |
| Maximum Input Level (PER < 10%)                 | -20      |         |         | dBm  |
| Adjacent Channel Rejection (PER < 10%)          | -1       |         |         | dB   |

## 12.3 DC/RF Characteristics for IEEE 802.11n - 2.4 GHz

**Table 32: Characteristics values for IEEE 802.11n - 2.4 GHz**

| Items             | Contents         |
|-------------------|------------------|
| Specification     | IEEE 802.11n     |
| Mode              | OFDM             |
| Channel Frequency | 2412 to 2472 MHz |
| Data rate         | MCS0 - MCS7      |

### 12.3.1 High-Rate Condition for IEEE 802.11n - 2.4 GHz

**Conditions:** 25 °C, VBAT = 3.3V, VIO = 1.8V, Output power setting = 15 dBm at module pad, MCS7 mode

**Table 33: High-Rate Condition for IEEE 802.11n - 2.4 GHz**

| Items  | Contents | Minimum | Typical | Maximum | Unit |
|--|----------|---------|---------|---------|------|
| <b>DC Characteristics</b>                                |          |         |         |         |      |
| DC current   |          |         |         |         |      |
| • Tx mode  |          | 316     | 426     | mA      |      |
| • Rx mode  |          | 64      | 76      | mA      |      |
| <b>Tx Characteristics</b>                                |          | Minimum | Typical | Maximum | Unit |
| Output Power   | 13.0     | 15.0    | 17.0    | dBm     |      |
| Spectrum Mask Margin                                     |          |         |         |         |      |
| • 9 MHz to 11 MHz (0 ~ -20 dB <sub>r</sub> )             | 0        |         |         |         | dB   |
| • 11 MHz to 20 MHz (-20 ~ -28 dB <sub>r</sub> )          | 0        |         |         |         | dB   |
| • 20 MHz to 30 MHz (-28 ~ -45 dB <sub>r</sub> )          | 0        |         |         |         | dB   |
| • 30 MHz to 33 MHz (-45 dB <sub>r</sub> )                | 0        |         |         |         | dB   |
| Constellation Error (EVM)<br>(Measured at enhanced mode) |          |         |         | -27     | dB   |
| Frequency Tolerance                                      | -20      |         | 20      | ppm     |      |
| Spurious Emissions                                       |          |         |         |         |      |
| • 30 - 47 MHz (BW = 100 kHz)                             |          |         | -36     |         | dBm  |
| • 47 - 74 MHz (BW = 100 kHz)                             |          |         | -54     |         | dBm  |
| • 74 - 87.5 MHz (BW = 100 kHz)                           |          |         | -36     |         | dBm  |
| • 87.5 - 118 MHz (BW = 100 kHz)                          |          |         | -54     |         | dBm  |
| • 118 - 174 MHz (BW = 100 kHz)                           |          |         | -36     |         | dBm  |
| • 174 - 230 MHz (BW = 100 kHz)                           |          |         | -54     |         | dBm  |
| • 230 - 470 MHz (BW = 100 kHz)                           |          |         | -36     |         | dBm  |
| • 470 - 862 MHz (BW = 100 kHz)                           |          |         | -54     |         | dBm  |
| • 862 - 1000 MHz (BW = 100 kHz)                          |          |         | -36     |         | dBm  |
| • 1000 - 12750 MHz (BW = 1 MHz)                          |          |         | -30     |         | dBm  |
| <b>Rx Characteristics</b>                                |          | Minimum | Typical | Maximum | Unit |
| Minimum Input Level (PER ≤ 10%)                          |          |         |         | -64     | dBm  |
| Maximum Input Level (PER < 10%)                          | -20      |         |         |         | dBm  |
| Adjacent Channel Rejection (PER ≤ 10%)                   | -2       |         |         |         | dB   |

## 12.3.2 Low-Rate Condition for IEEE 802.11n - 2.4 GHz

**Conditions:** 25 °C, VBAT = 3.3V, VIO = 1.8V, Output power setting = 16 dBm at module pad, MCS0 mode

Table 34: Low-Rate Condition for IEEE 802.11n - 2.4 GHz

| Items  | Contents |         |         |      |
|--|----------|---------|---------|------|
| DC Characteristics                                       | Minimum  | Typical | Maximum | Unit |
| DC current   |          |         |         |      |
| • Tx mode  |          | 342     | 466     | mA   |

| • 30 - 47 MHz (BW = 100 kHz)                        |          |         | -36     | dBm  |
| • 47 - 74 MHz (BW = 100 kHz)                        |          |         | -54     | dBm  |
| • 74 - 87.5 MHz (BW = 100 kHz)                      |          |         | -36     | dBm  |
| • 87.5 - 118 MHz (BW = 100 kHz)                     |          |         | -54     | dBm  |
| • 118 - 174 MHz (BW = 100 kHz)                      |          |         | -36     | dBm  |
| • 174 - 230 MHz (BW = 100 kHz)                      |          |         | -54     | dBm  |
| • 230 - 470 MHz (BW = 100 kHz)                      |          |         | -36     | dBm  |
| • 470 - 862 MHz (BW = 100 kHz)                      |          |         | -54     | dBm  |
| • 862 - 1000 MHz (BW = 100 kHz)                     |          |         | -36     | dBm  |
| • 1000 - 12750 MHz (BW = 1 MHz)                     |          |         | -30     | dBm  |
| Rx Characteristics                                  | Minimum  | Typical | Maximum | Unit |
| Receiver sensitivity (PER < 30.8%)                  |          | -97     | -70     | dBm  |
| Maximum input signal level (PER < 30.8%)            | -10      |         |         | dBm  |
| PER Report Integrity (-30 dBm input)                | 50       |         | 65.4    | %    |

## 13 Land Patterns

**Figure 21** shows the land patterns.

**Figure 21: Land Patterns**

To avoid the short-circuit between the side shielding and solder on the module land after the reflow, please place the module land at 0.2 mm away from module outline, as shown in above figure.

## 14 General for Radio Regulatory Certification for LBEE5QD1ZM

This section contains the following topics:

- Application model part number
- Label
- Package Label
- Country of Origin

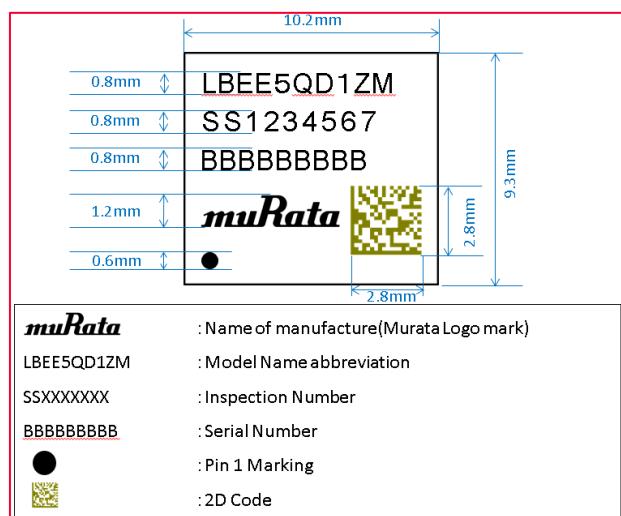

### 14.1 Application model part number

Basically, we apply for “LBEE5QD1ZM” in each country.

### 14.2 Label

**Figure 22** shows the certification label of Type 1ZM module.

**Figure 22: Radio Regulatory Certification Label**

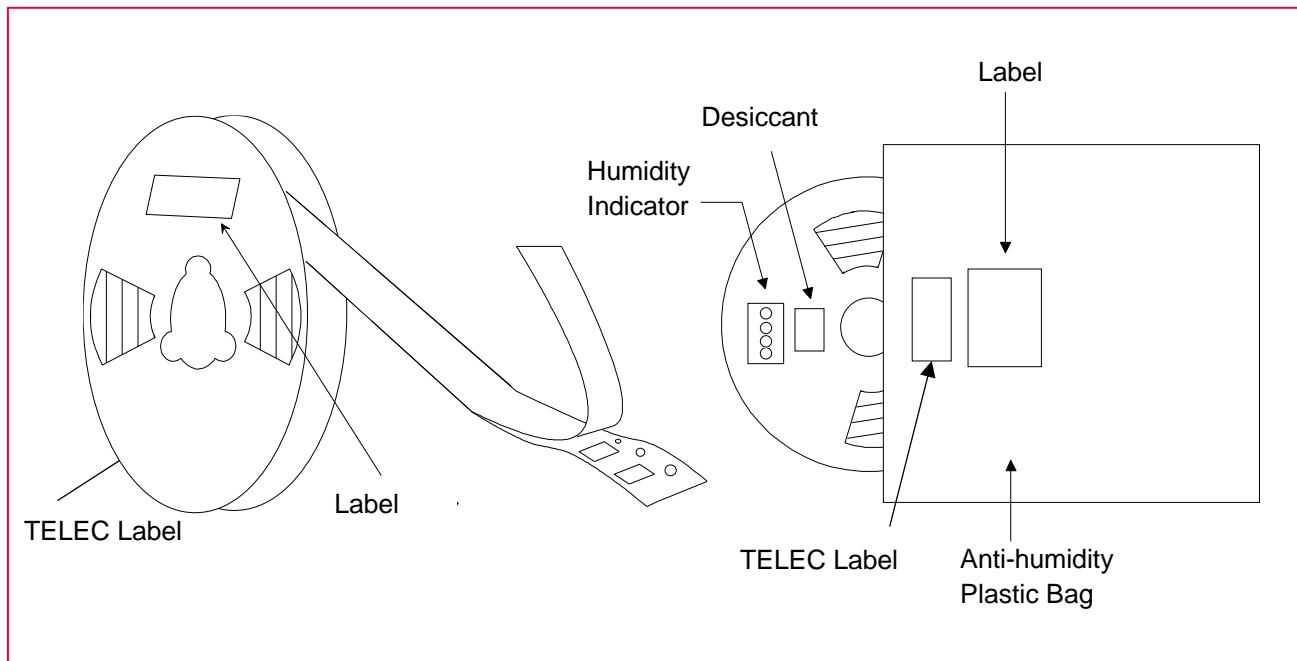

Since there is no space to describe the notational requirements of each country, we are applying for the notational requirements to be posted in the manual or package.

## 14.3 Package Label

**Figure 23** shows the package label information (Humidity Proof Packing).

**Figure 23: Package (Humidity Proof Packing)**

The package label may be attached on one side only.

Package label display example is shown in **Figure 24**

**Figure 24: Package Label Display Example**

## 14.4 Country of Origin

### China

SHENZHEN MURATA TECHNOLOGY CO., LTD.

Some countries have applied for two countries, China and Japan, in preparation for future factory changes, but the production site in the delivery specifications is the above-mentioned factory in China.

## 15 Radio Regulatory Certification by Country for LBEE5QD1ZM

This section includes regulatory certification information all the following countries:

- Japan
- FCC
- ISED
- Europe

## 15.1 Japan

- Manufacturer: Murata Manufacturing Co., Ltd.
- Model or Product Name: LBEE5QD1ZM
- This module has received "CERTIFICATION for TYPE CERTIFICATION" under the Japanese Radio Act.

### Japanese Version

#### 電波法の要求に基づく警告

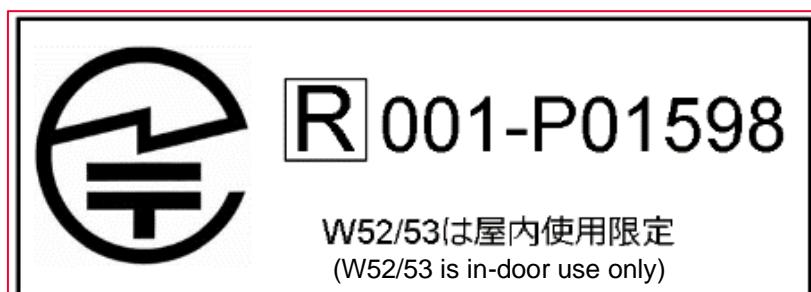

(警告) 5 GHz の周波数帯においては、5.2 GHz/5.3 GHz/5.6GHz 帯(W52/W53/W56)の 3 種類の帯域を使用することができます。5.2 GHz/5.3 GHz 帯無線 LAN(W52/W53)の屋外使用は 5.2 GHz 帯高出力データ通信システムの基地局又は陸上移動中継局と通信する場合を除き電波法で禁止されています。

### English Version

Warning based on the requirements of Japanese Radio Act

(Warning) In the 5 GHz frequency band, you can use 3 bands: 5.2 GHz/5.3 GHz/5.6 GHz (W52/W53/W56).

Outdoor use of 5.2 GHz/5.3 GHz band wireless LANs (W52/W53) is prohibited by the Radio Act except when communicating with 5.2 GHz band high-power data communication system base stations or land mobile relay stations.

## 15.1.1 Power Levels for Japan

**Table 59** and **Table 60** shows the per antenna port power table for 2.4 GHz for WLAN and Bluetooth. **Table 61**, **Table 62**, and **Table 63** shows the per antenna port power table for 5 GHz WLAN.

**Table 59: Japan Power Level 2.4 GHz WLAN Per Antenna Port**

| Band             | Data rate    | Minimum (dBm) | Typical (dBm) | Maximum (dBm) |
|------------------|--------------|---------------|---------------|---------------|
| <b>Channels:</b> |              | <b>1 ~ 13</b> |               |               |
| 11b              | 1 ~ 11 Mbps  | 14.0          | 16.0          | 18.0          |
| 11g              | 6 ~ 18 Mbps  | 15.0          | 17.0          | 19.0          |
|                  | 24 ~ 54 Mbps | 14.0          | 16.0          | 18.0          |
| 11n_HT20         | MCS0 ~ 2     | 14.0          | 16.0          | 18.0          |
|                  | MCS3 ~ 7     | 13.0          | 15.0          | 17.0          |
| 11ac_HT20        | MCS0 ~ 2     | 14.0          | 16.0          | 18.0          |
|                  | MCS3 ~ 7     | 13.0          | 15.0          | 17.0          |
|                  | MCS8         | 12.0          | 14.0          | 16.0          |

**Table 60: Japan Power Level 2.4 GHz BT/BLE Per Antenna Port**

| Standard     | Data rate         | Minimum (dBm)          | Typical (dBm) | Maximum (dBm) |
|--------------|-------------------|------------------------|---------------|---------------|
| <b>Band:</b> |                   | <b>2402 ~ 2480 MHz</b> |               |               |
| BT           | BR (DH5)          | 0.0                    | 3.0           | 6.0           |
|              | EDR (2DH5 & 3DH5) | -3.0                   | 0.0           | 3.0           |
| BLE          | 1 Mbps            | 0.0                    | 3.0           | 6.0           |
|              | 2 Mbps            | 0.0                    | 3.0           | 6.0           |

## 15.1.2 Antenna List

**Table 64** shows list of antennas registered under the Japan Radio Act.

**Table 64: Antenna Registered Under the Japan Radio Act**

| No. | Maker  | Support Antenna    |               |          |         |       |                  | Detail                          |  |
|-----|--------|--------------------|---------------|----------|---------|-------|------------------|---------------------------------|--|
|     |        | P/N                | Form factor   | Type     | Gain    |       | Size             |                                 |  |
|     |        |                    |               |          | 2.4 GHz | 5 GHz |                  |                                 |  |
| 1   | Molex  | 146153             | u.FL/flexible | Dipole   | 3.2     | 4.25  | 35x9x0.1 mm      | Flexible//horizontal            |  |
| 2   | Molex  | 146187             | u.FL/flexible | Dipole   | 3.4     | 4.75  | 40.95x9x0.7 mm   | Rigid//horizontal               |  |
| 3   | Molex  | 206994             | u.FL/flexible | Monopole | 3.6     | 3.6   | 15.4x6.4x0.15 mm | adhesive // flexible //vertical |  |
| 4   | Murata | LBEE5QD1ZM-Antenna | N/A           | Monopole | 3.6     | 4.6   |                  | Pattern Antenna                 |  |

## 15.1.3 About Notations

It is recommended that the indication of (1) or (2) below is described on the product incorporating this module in Japanese. If there is any problem with the indication of (1) or (2) on the product, we recommend indicating (1) or (2) in the user manual or on the package of the product incorporating this module, or electronic display on the product. In the case of the electronic display, it is necessary to describe "using the electronic display" + "how to reach to below indication" in the user manual of the product.

- Recommended Indication 1

**Japanese Version**

本製品は、電波法に基づく工事設計認証(認証番号:001-P01598)を受けた特定無線設備を内蔵しています。

**English Version**

This product incorporates specified radio equipment that has received CERTIFICATION for TYPE CERTIFICATION (certification number: 001-P01598) based on the Japan Radio Act.

- Recommended Indication 2

**Japanese Version**

R 001-P01598

5.2 GHz/5.3 GHz 帯無線 LAN (W52/W53)の屋外使用は 5.2 GHz 帯高出力データ通信システムの基地局又は陸上移動中継局と通信する場合を除き電波法で禁止されています。

**English Version**

R 001-P01598

Outdoor use of 5.2 GHz/5.3 GHz band wireless LANs (W52/W53) is prohibited by the Radio Act except when communicating with 5.2 GHz band high-power data communication system base stations or land mobile relay stations.

## 15.2 FCC

### FCC ID: VPYLB1ZM

This module is not directly sold to general end users. Therefore, there is no user manual of module. For the details about this module, please refer to the specification sheet of module.

This module should be installed in the host device according to the interface specification (installation procedure).

1. This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:(1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.
2. This device complies with below part 15 of FCC Rules.
  - Part 15 Subpart C
  - Part 15 Subpart E
3. The modular transmitter is only FCC authorized for the specific rule parts (i.e., FCC transmitter rules) listed on the grant, and the host product manufacturer is responsible for compliance to any other FCC rules that apply to the host not covered by the modular transmitter grant of certification. The final host product still requires Part 15 Subpart B compliance testing with the modular transmitter installed.
4. This module designed for mounting inside of the end product by us professionally. Therefore, it complies with the antenna and transmission system requirements of §15.203.
5. Since there is no space which indicates FCC ID on this module, FCC ID is indicated in a manual. If the FCC ID is not visible when the module is installed inside another device, then the module is installed must also display a label referring to the enclosed module.

### 15.2.1 Supply Voltage

**Table 65** shows the supply voltage information.

**Table 65: Supply Voltage Values**

| DUT PIN Name       | Minimum | Typical | Maximum | Unit |
|--------------------|---------|---------|---------|------|
| VBAT <sup>13</sup> | 2.7     | 3.3     | 5.5     | V    |
| VIO                | 1.62    | 1.8     | 1.98    | V    |

### 15.2.2 Power Level for FCC

**Table 66** and **Table 67** shows the per antenna port power table for 2.4 GHz for WLAN and Bluetooth. **Table 68** shows the per antenna port power table for 5 GHz WLAN.

**Table 66: FCC Power Level 2.4 GHz WLAN Per Antenna Port**

| Mode         | Band    | Rate      | Channel       | Maximum Tune Up Tolerance (dBm) |
|--------------|---------|-----------|---------------|---------------------------------|
| IEEE 802.11b | 2.4 GHz | All Rates | 1 ~ 11        | 17.0 ± 2.0                      |
| IEEE 802.11g | 2.4 GHz | All Rates | 1 ~ 3, 9 ~ 11 | 14.0 ± 2.0                      |

<sup>13</sup> VBAT: Only this power supply affects the RF characteristics.

| Mode                  | Band    | Rate   | Channel       | Maximum Tune Up Tolerance (dBm) |
|-----------------------|---------|--|---------------|---------------------------------|
|                       |         | 6 Mbps, 9 Mbps, 12 Mbps, 18 Mbps                                     | 4 ~ 8         | 17.0 ± 2.0                      |
|                       |         | 24 Mbps, 36 Mbps, 48 Mbps, 54 Mbps                                   | 4 ~ 8         | 16.0 ± 2.0                      |

|                       | VHT_SS1_MCS3 ~ VHT_SS1_MCS9 | W56<br>W58 | 122, 138  | 13.0 ± 2.0                      |
|                       | VHT_SS1_MCS0 ~ VHT_SS1_MCS2 |            | 155       | 14.0 ± 2.0                      |
|                       | VHT_SS1_MCS3 ~ VHT_SS1_MCS9 |            | 155       | 13.0 ± 2.0                      |

### 15.2.3 Theory of Operation for FCC

**Table 69** shows the theory of operation power tables for WLAN.

**Table 69: FCC Theory of Operation for WLAN**

| Frequency of Operation |                      | Scan          | Ad-hoc mode |
|------------------------|----------------------|---------------|-------------|
| 2.4 GHz                | 11b/g/n/ac ((V)HT20) | 2412-2462 MHz | Active      |
| W52                    | 11a/n/ac ((V)HT20)   | 5180-5240 MHz | Active      |
|                        | 11n/ac ((V)HT40)     | 5190-5230 MHz | Active      |
|                        | 11ac (VHT80)         | 5210 MHz      | Active      |
| W53                    | 11a/n/ac ((V)HT20)   | 5260-5320 MHz | Passive     |
|                        | 11n/ac ((V)HT40)     | 5270-5310 MHz | Passive     |
|                        | 11ac (VHT80)         | 5290 MHz      | Passive     |
| W56                    | 11a/n/ac ((V)HT20)   | 5500-5720 MHz | Passive     |
|                        | 11n/ac ((V)HT40)     | 5510-5710 MHz | Passive     |
|                        | 11ac (VHT80)         | 5530-5690 MHz | Passive     |
| W58                    | 11a/n/ac ((V)HT20)   | 5745-5825 MHz | Active      |
|                        | 11n/ac ((V)HT40)     | 5755-5795 MHz | Active      |
|                        | 11ac (VHT80)         | 5775 MHz      | Active      |

## 15.2.4 Information to Display in User Manual of Host Device

The following statements must be described on the user manual of the host device of this module

- Contains Transmitter Module FCC ID: VPYLB1ZM or Contains FCC ID: VPYLB1ZM
- **FCC CAUTION:** Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.
- This transmitter must not be co-located or operated in conjunction with any other antenna or transmitter.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

If it is difficult to describe this statement on the host product due to the size, please describe in the User's manual.

## 15.2.5 Compliance with FCC requirement 15.407(c)

Data transmission is always initiated by software, which is passed down through the MAC, through the digital and analog baseband, and finally to the RF chip. Several special packets are initiated by the MAC. These are the only ways the digital baseband portion will turn on the RF transmitter, which it then turns off at the end of the packet. Therefore, the transmitter will be on only while one of the aforementioned packets is being transmitted. In other words, this device automatically discontinue transmission in case of either absence of information to transmit or operational failure.

Frequency Tolerance: ±20 ppm

## 15.2.6 Equipment Installation for FCC

The product can be installed on portable equipment and mobile equipment. The information to be displayed are described in this section.

### 15.2.6.1 Portable Equipment (FCC)

Equipment for which the spaces between human body and antenna are used within 20 cm. When installing it in a portable equipment, please describe the following warning to the manual.

The available scientific evidence does not show that any health problems are associated with using low power wireless devices. There is no proof, however, that these low power wireless devices are absolutely safe. Low power Wireless devices emit low levels of radio frequency energy (RF) in the microwave range while being used. Whereas high levels of RF can produce health effects (by heating tissue), exposure of low-level RF that does not produce heating effects causes no known adverse health effects. Many studies of low-level RF exposures have not found any biological effects. Some studies have suggested that some biological effects might occur, but such findings have not been confirmed by additional research. LBE5QD1ZM has been tested and found to comply with FCC radiation exposure limits set forth for an uncontrolled environment and meets the FCC radio frequency (RF) Exposure Guidelines.

It is necessary to take a SAR test with your set mounting this module (except to use only Bluetooth). Class II permissive change application is necessary using the SAR report. Please contact Murata.

### 15.2.6.2 Mobile Equipment (FCC)

Equipment used at position in which the spaces between human body and antenna exceeded 20 cm. When installing it in a mobile equipment, please describe the following warning to the manual.

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment and meets the FCC radio frequency (RF) Exposure Guidelines. This equipment should be installed and operated keeping the radiator at least 20 cm or more away from person's body.

## 15.3 ISED

HVIN: LBEE5QD1ZM

PMN: LBEE5QD1ZM

IC Number: 772C-LB1ZM

This module is not sold to general end users directly, therefore, there is no user manual of module. For details about this module, please refer to the specification sheet of module.

This module should be installed in the host device according to the interface specification (installation procedure).

### 15.3.1 Information to Display in Host Device and User Manual

#### 15.3.1.1 Information on Host Device

The following information must be indicated on the host device of this module.

- Contains IC: 772C-LB1ZM

#### 15.3.1.2 Information on User Manual

The following statements must be described on the user manual of the host device of this module.

This device complies with Industry Canada's applicable license-exempt RSSs. Operation is subject to the following two conditions:

1. This device may not cause interference; and
2. This device must accept any interference, including interference that may cause undesired operation of the device.

Le présent appareil est conforme aux CNR d'Industrie Canada applicables aux appareils radio exempts de licence. L'exploitation est autorisée aux deux conditions suivantes :

1. l'appareil ne doit pas produire de brouillage;
2. l'utilisateur de l'appareil doit accepter tout brouillage radioélectrique subi, même si le brouillage est susceptible d'en compromettre le fonctionnement.

Data transmission is always initiated by software, which is passed down through the MAC, through the digital and analog baseband, and finally to the RF chip. Several special packets are initiated by the MAC. These are the only ways the digital baseband portion will turn on the RF transmitter, which it then turns off at the end of the packet. Therefore, the transmitter will be on only while one of the aforementioned packets is being transmitted. In other words, this device automatically discontinues transmission in case of either absence of information to transmit or operational failure.

La transmission des données est toujours initiée par le logiciel, puis les données sont transmises par l'intermédiaire du MAC, par la bande de base numérique et analogique et, enfin, à la puce RF. Plusieurs paquets spéciaux sont initiés par le MAC. Ce sont les seuls moyens pour qu'une partie de la bande de base numérique active l'émetteur RF, puis désactive celui-ci à la fin du paquet. En conséquence, l'émetteur reste uniquement activé lors de la transmission d'un des paquets susmentionnés. En d'autres termes, ce dispositif interrompt automatiquement toute transmission en cas d'absence d'information à transmettre ou de défaillance.

If it is difficult to describe this statement on the host product due to the size, please describe in the User's manual.

In case of the final product which can be carried around to outdoor, the following indication is necessary to the final product.

- When the AP function is used in W52.
  - At the time of a channel setting of W52, please indicate "for indoor use only". During connecting, please show the channel number which connects.
  - And please indicate that the end user may find out "for indoor use only channel".
- When the STA function is used in channel 52, 54, 58, at the time of the channel 52 or 54 or 58 setting, please indicate "for indoor use only channel".
  - During connecting, please show the channel number which connects.
  - And please indicate that the end user may find out "for indoor use only channel".

### 15.3.2 Antenna Installation in End Product

If the antenna of the end product is removed, please describe the follow warning on the manual of the end product which contains this module.

This radio transmitter (IC Number: 772C-LB1ZM) identify the device by certification number or model number if Category II) has been approved by Industry Canada to operate with the antenna types listed below with the maximum permissible gain indicated. Antenna types not included in this list, having a gain greater than the maximum gain indicated for that type, are strictly prohibited for use with this device.

- : 146153 Dual Dipole antenna Gain: +3.2dBi@2.4GHz + 4.25dBi@5GHz
- : 146187 Dual Dipole antenna Gain: +3.4dBi@2.4GHz + 4.75dBi@5GHz
- : LBEE5QD1ZM-Antenna monopole antenna Gain: +3.6dBi@2.4GHz + 4.6dBi@5GHz

Le présent émetteur radio (IC Number: 772C-LB1ZM) a été approuvé par Industrie Canada pour fonctionner avec les types d'antenne énumérés ci dessous et ayant un gain admissible maximal. Les types d'antenne non inclus dans cette liste, et dont le gain est supérieur au gain maximal indiqué, sont strictement interdits pour l'exploitation de l'émetteur.

Type d'antenne

- : 146153 Dual Dipole antenna Gain: +3.2dBi@2.4GHz + 4.25dBi@5GHz
- : 146187 Dual Dipole antenna Gain: +3.4dBi@2.4GHz + 4.75dBi@5GHz
- : LBEE5QD1ZM-Antenna monopole antenna Gain: +3.6dBi@2.4GHz + 4.6dBi@5GHz

If the final product uses the following frequency, please note that there is a limit.

|   |
|---|
| For indoor use only (5150-5250 MHz band and channel 52, 54, 58) |
|---|

|  |
|--|
| Pour usage intérieur seulement (5150-5250 MHz band and channel 52, 54, 58) |
|--|

### 15.3.3 Equipment Installation for ISED

There are two types of installation for host device.

#### 15.3.3.1 Portable Equipment

Equipment for which the spaces between human body and antenna are used within 20 cm. When installing it in a portable equipment. Please describe the following warning to the manual.

The available scientific evidence does not show that any health problems are associated with using low power wireless devices. There is no proof, however, that these low power wireless devices are safe. Low power Wireless devices emit low levels of radio frequency energy (RF) in the microwave range while being used. Whereas high levels of RF can produce health effects (by heating tissue), exposure of low-level RF that does not produce heating effects causes no known adverse health effects. Many studies of low-level RF exposures have not found any biological effects. Some studies have suggested that some biological effects might occur, but such findings have not been confirmed by

additional research. LBEE5QD1ZM has been tested and found to comply with IC radiation exposure limits set forth for an uncontrolled environment and meets RSS-102 of the IC radio frequency (RF) Exposure rules.

Les connaissances scientifiques dont nous disposons n'ont mis en évidence aucun problème de santé associé à l'usage des appareils sans fil à faible puissance. Nous ne sommes cependant pas en mesure de prouver que ces appareils sans fil à faible puissance sont entièrement sans danger. Les appareils sans fil à faible puissance émettent une énergie fréquence radioélectrique (RF) très faible dans le spectre des micro-ondes lorsqu'ils sont utilisés. Alors qu'une dose élevée de RF peut avoir des effets sur la santé (en chauffant les tissus), l'exposition à de faibles RF qui ne produisent pas de chaleur n'a pas de mauvais effets connus sur la santé. De nombreuses études ont été menées sur les expositions aux RF faibles et n'ont découvert aucun effet biologique. Certaines études ont suggéré qu'il pouvait y avoir certains effets biologiques, mais ces résultats n'ont pas été confirmés par des recherches supplémentaires. LBEE5QD1ZM a été testé et jugé conforme aux limites d'exposition aux rayonnements IC énoncées pour un environnement non contrôlé et respecte les règles d'exposition aux fréquences radioélectriques (RF) CNR-102 de l'IC.

It is necessary to take a SAR test with your set mounting this module.

Class 4 permissive change application is necessary using the SAR report.

Please contact Murata.

### 15.3.3.2 Mobile Equipment

Equipment used at position in which the spaces between human body and antenna exceeded 20 cm. When installing it in a mobile equipment. Please describe the following warning to the manual.

This equipment complies with IC radiation exposure limits set forth for an uncontrolled environment and meets RSS-102 of the IC radio frequency (RF) Exposure rules. This equipment should be installed and operated keeping the radiator at least 20 cm or more away from person's body.

Cet équipement est conforme aux limites d'exposition aux rayonnements énoncées pour un environnement non contrôlé et respecte les règles d'exposition aux fréquences radioélectriques (RF) CNR-102 de l'IC. Cet équipement doit être installé et utilisé en gardant une distance de 20 cm ou plus entre le radiateur et le corps humain.

## 15.3.4 Power Level for ISED

**Table 70** and **Table 71** show the per antenna port power table for 2.4 GHz for WLAN and Bluetooth. **Table 72** shows the per antenna port power table for 5 GHz WLAN.

**Table 70: ISED Power Level 2.4 GHz WLAN Per Antenna Port**

| Mode                  | Band    | Rate   | Channel   | Maximum Tune Up Tolerance (dBm) |
|-----------------------|---------|--|-----------|---------------------------------|
| IEEE 802.11b          | 2.4 GHz | All Rates  | 1~11      | 17.0 ± 2.0                      |
| IEEE 802.11g          | 2.4 GHz | All Rates  | 1~3, 9~11 | 14.0 ± 2.0                      |
|                       |         | 6 Mbps, 9 Mbps, 12 Mbps, 18 Mbps                                     | 4~8       | 17.0 ± 2.0                      |
|                       |         | 24 Mbps, 36 Mbps, 48 Mbps, 54 Mbps                                   | 4~8       | 16.0 ± 2.0                      |
| IEEE 802.11n (HT20)   | 2.4 GHz | All Rates  | 1~3, 9~11 | 13.0 ± 2.0                      |
|                       |         | MCS0, MCS1, MCS2   | 4~8       | 16.0 ± 2.0                      |
|                       |         | MCS3, MCS4, MCS5, MCS6, MCS7   | 4~8       | 15.0 ± 2.0                      |
| IEEE 802.11ac (VHT20) | 2.4 GHz | All Rates  | 1~3, 9~11 | 13.0 ± 2.0                      |
|                       |         | VHT_SS1_MCS0, VHT_SS1_MCS1, VHT_SS1_MCS2                             | 4~8       | 16.0 ± 2.0                      |
|                       |         | VHT_SS1_MCS3, VHT_SS1_MCS4, VHT_SS1_MCS5, VHT_SS1_MCS6, VHT_SS1_MCS7 | 4~8       | 15.0 ± 2.0                      |
|                       |         | VHT_SS1_MCS8   | 4~8       | 14.0 ± 2.0                      |

**Table 71: ISED Power Level 2.4 GHz BT/BLE Per Antenna Port**

| Mode      | Maximum Tune Up Tolerance (dBm) |
|-----------|---------------------------------|
| BR        | 3.0 ± 3.0                       |
| EDR       | 0.0 ± 3.0                       |
| LE        | 3.0 ± 3.0                       |
| LE 2 Mbps | 3.0 ± 3.0                       |

**Table 72: ISED Power Level 5 GHz WLAN Per Antenna Port**

| Mode                | Rate      | Band    | Channel                             | Maximum Tune Up Tolerance (dBm) |
|---------------------|-----------|---------|-------------------------------------|---------------------------------|
| IEEE 802.11a        | All Rates | W52/W53 | 36, 64                              | 14.0 ± 2.0                      |
|                     |           | W52/W53 | 40~60                               | 15.0 ± 2.0                      |
|                     |           | W56     | 100                                 | 14.0 ± 2.0                      |
|                     |           | W56     | 104~144 (not include 120, 124, 128) | 15.0 ± 2.0                      |
|                     |           | W58     | 149~165                             | 15.0 ± 2.0                      |
| IEEE 802.11n (HT20) | All Rates | W52/W53 | 36, 64                              | 13.0 ± 2.0                      |
|                     |           | W52/W53 | 40~60                               | 14.0 ± 2.0                      |
|                     |           | W56     | 100                                 | 13.0 ± 2.0                      |

## 15.3.5 Theory of Operation for ISED

**Table 73** shows the theory of operation power tables for WLAN and Bluetooth.

**Table 73: ISED Theory Operation for WLAN**

| Frequency of Operation |                      |  | Scan    | Ad-hoc mode |
|------------------------|----------------------|--|---------|-------------|
| 2.4 GHz                | 11b/g/n/ac ((V)HT20) | 2412-2462 MHz                                  | Active  | Yes         |
|                        | 11a/n/ac ((V)HT20)   | 5180-5240 MHz                                  | Active  | Yes         |
|                        | 11n/ac ((V)HT40)     | 5190-5230 MHz                                  | Active  | Yes         |
|                        | 11ac (VHT80)         | 5210 MHz                                       | Active  | Yes         |
| W52                    | 11a/n/ac ((V)HT20)   | 5260-5320 MHz                                  | Passive | No          |
|                        | 11n/ac ((V)HT40)     | 5270-5310 MHz                                  | Passive | No          |
|                        | 11ac (VHT80)         | 5290 MHz                                       | Passive | No          |
| W53                    | 11a/n/ac ((V)HT20)   | 5500-5720 MHz<br>(*ISED:5600-5650 MHz disable) | Passive | No          |
|                        | 11n/ac ((V)HT40)     | 5510-5710 MHz<br>(*ISED:5600-5650 MHz disable) | Passive | No          |
|                        | 11ac (VHT80)         | 5530-5690 MHz<br>(*ISED:5600-5650 MHz disable) | Passive | No          |
| W56                    | 11a/n/ac ((V)HT20)   | 5745-5825 MHz                                  | Active  | Yes         |
|                        | 11n/ac ((V)HT40)     | 5755-5795 MHz                                  | Active  | Yes         |
|                        | 11ac (VHT80)         | 5775 MHz                                       | Active  | Yes         |
| W58                    | 11a/n/ac ((V)HT20)   | 5745-5825 MHz                                  | Active  | Yes         |
|                        | 11n/ac ((V)HT40)     | 5755-5795 MHz                                  | Active  | Yes         |
|                        | 11ac (VHT80)         | 5775 MHz                                       | Active  | Yes         |

## 15.4 Europe

Product name: Communication Module

Model: LBEE5QD1ZM

Manufacture: Murata manufacturing Co., Ltd.

When shipping final products with this module to Europe, make a self-declaration that the product complies with European regulations and apply the CE mark.

The following report is issued:

- Radio Equipment Directive (RED) 2014/53/EU Article 3.2
  - Conforms to EN 300 328 v2.2.2:2019 Antenna Terminated Conducted test only
    - Report No: T201215W01-RT1
  - Conforms to EN 301 893 v2.1.1:2017 Antenna Terminated Conducted test only
    - Report No.: T200915W04-RT3
  - Conforms to EN 300 440 v2.1.1:2017 Antenna Terminated Conducted test only
    - Report No.: T200915W04-RT5
- Radio Equipment Directive (RED) 2014/53/EU Article 3.1a
  - Conforms to: EN 62311:2008
    - Report No.: T201215W01-MC

These reports can be leveraged as part of the TCF of the final product.

### 15.4.1 Power Level for Europe

**Table 74** and **Table 75** show the per antenna port power table for 2.4 GHz for WLAN. **Table 76** shows the per antenna port power table for 5 GHz WLAN.

**Table 74: Europe Power Level 2.4 GHz WLAN Per Antenna Port**

| Mode   | Data Rate       | Output Power in dBm (typical) |
|--------|-----------------|-------------------------------|
|        |                 | Ch. 1-13                      |

## 15.4.2 Theory of Operation for Europe

**Table 77** show the theory of operation power tables for WLAN and Bluetooth.

**Table 77: Europe Theory of Operation for WLAN**

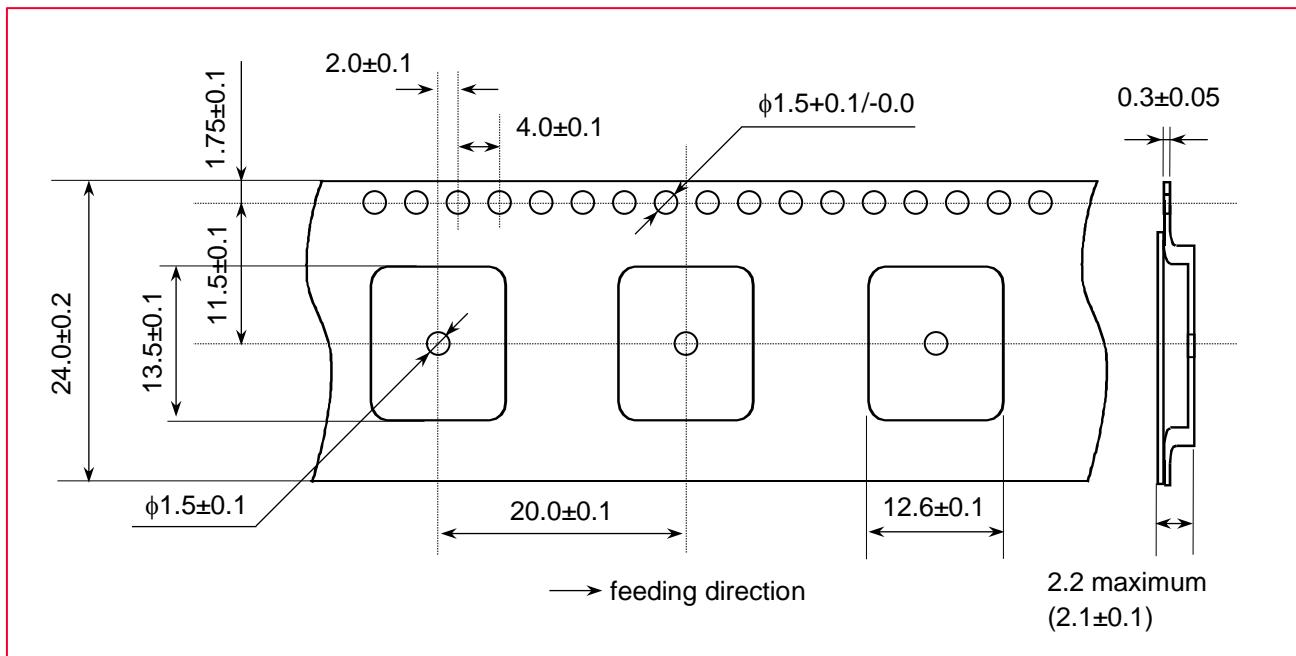

| Frequency of Operation |                      |               | Scan    | Ad-hoc mode |
|------------------------|----------------------|---------------|---------|-------------|
| W52                    | 11b/g/n/ac ((V)HT20) | 2412-2472 MHz | Active  | Yes         |
|                        | 11a/n/ac ((V)HT20)   | 5180-5240 MHz | Active  | Yes         |
|                        | 11n/ac ((V)HT40)     | 5190-5230 MHz | Active  | Yes         |
|                        | 11ac (VHT80)         | 5210 MHz      | Active  | Yes         |
| W53                    | 11a/n/ac ((V)HT20)   | 5260-5320 MHz | Passive | No          |
|                        | 11n/ac ((V)HT40)     | 5270-5310 MHz | Passive | No          |
|                        | 11ac (VHT80)         | 5290 MHz      | Passive | No          |
| W56                    | 11a/n/ac ((V)HT20)   | 5500-5700 MHz | Passive | No          |
|                        | 11n/ac ((V)HT40)     | 5510-5670 MHz | Passive | No          |
|                        | 11ac (VHT80)         | 5530-5610 MHz | Passive | No          |
| W58                    | 11a/n/ac ((V)HT20)   | 5745-5845 MHz | Active  | Yes         |
|                        | 11n/ac ((V)HT40)     | 5755-5835 MHz | Active  | Yes         |
|                        | 11ac (VHT80)         | 5775 MHz      | Active  | Yes         |

## 16 Tape and Reel Packing

### 16.1 Dimensions of Tape (Plastic Tape)

**Figure 25** is a graphical representation of the tape dimension (plastic tape)<sup>14</sup>.

**Figure 25: Dimensions of Tape (Unit: mm)**

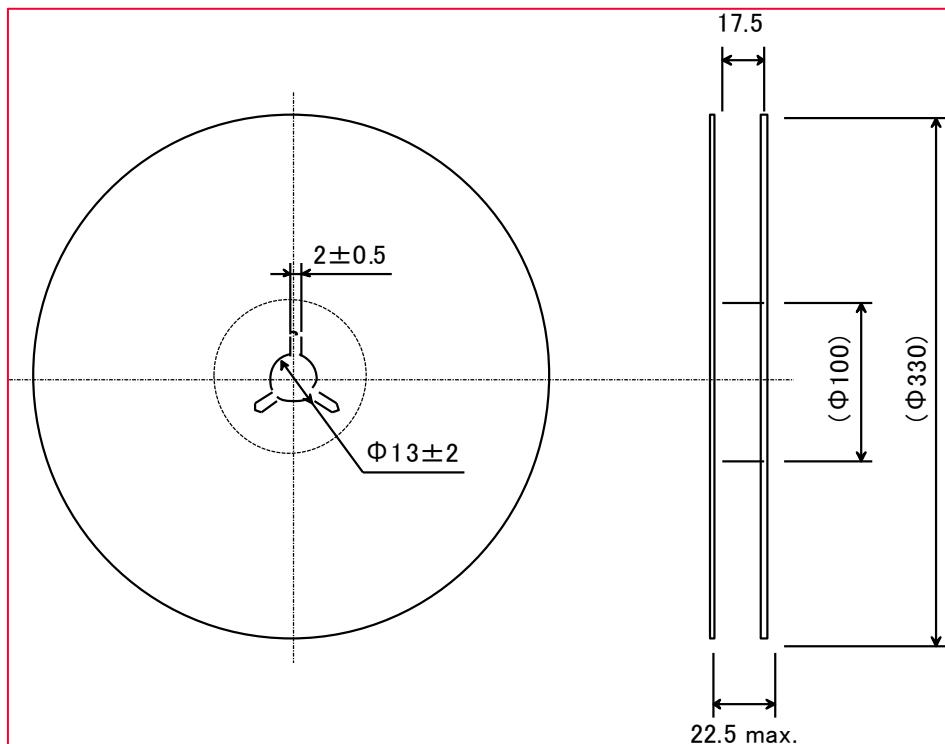

<sup>14</sup> Cumulative tolerance of maximum  $40.0 \pm 0.15$  mm every 10 pitches

## 16.2 Dimensions of Reel

**Figure 26** shows the reel dimensions.

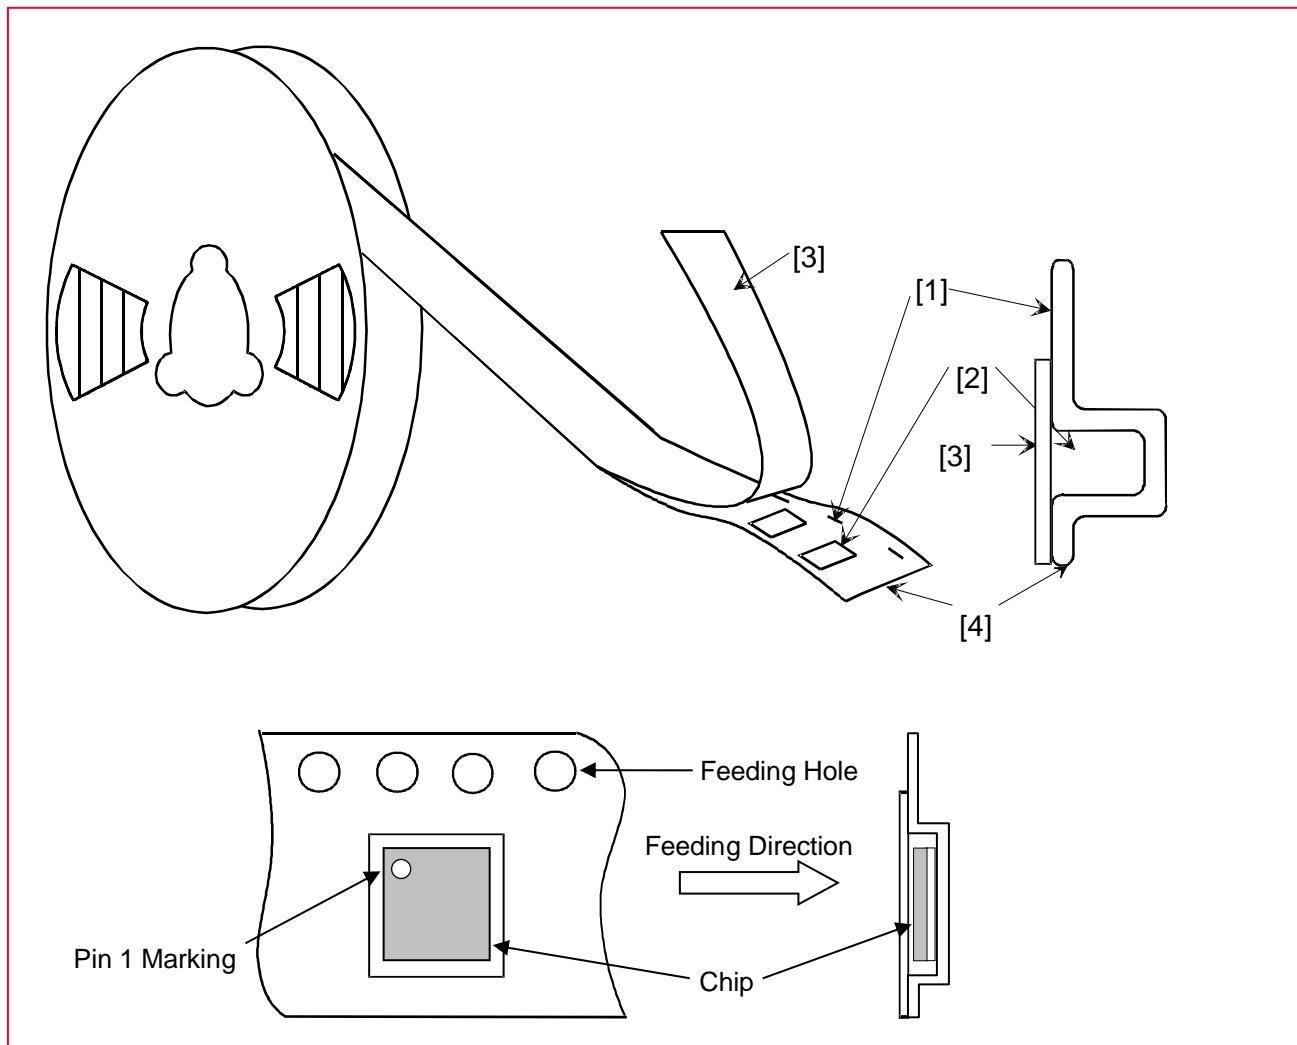

**Figure 26: Dimension of Reel (Unit: mm)**

## 16.3 Taping Diagrams

**Figure 27** shows the taping diagrams.

**Figure 27: Taping Diagrams**

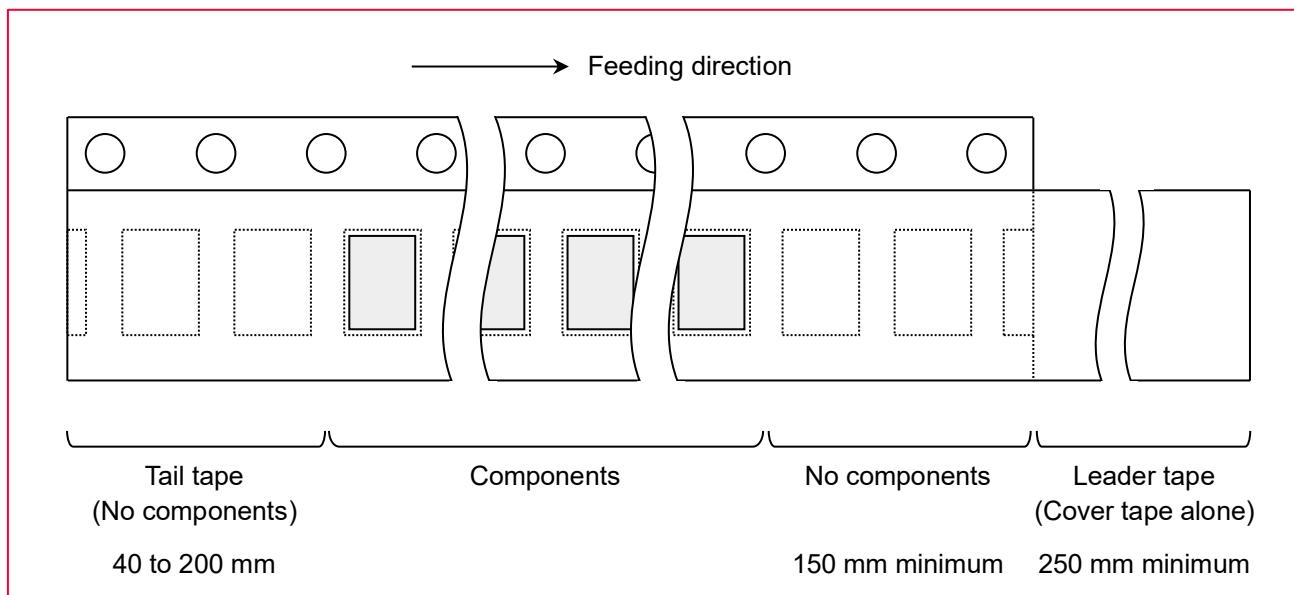

**Table 78: Taping Specifications**

| Mark | Description  |
|------|--|
| 1    | Feeding Hole. As specified in <a href="#">Dimensions of Tape (Plastic tape)</a> .  |
| 2    | Hole for chip. As specified in <a href="#">Dimensions of Tape (Plastic tape)</a> . |
| 3    | Cover tape. 62 µm in thickness.  |
| 4    | Base tape. As specified in <a href="#">Dimensions of Tape (Plastic tape)</a> .     |

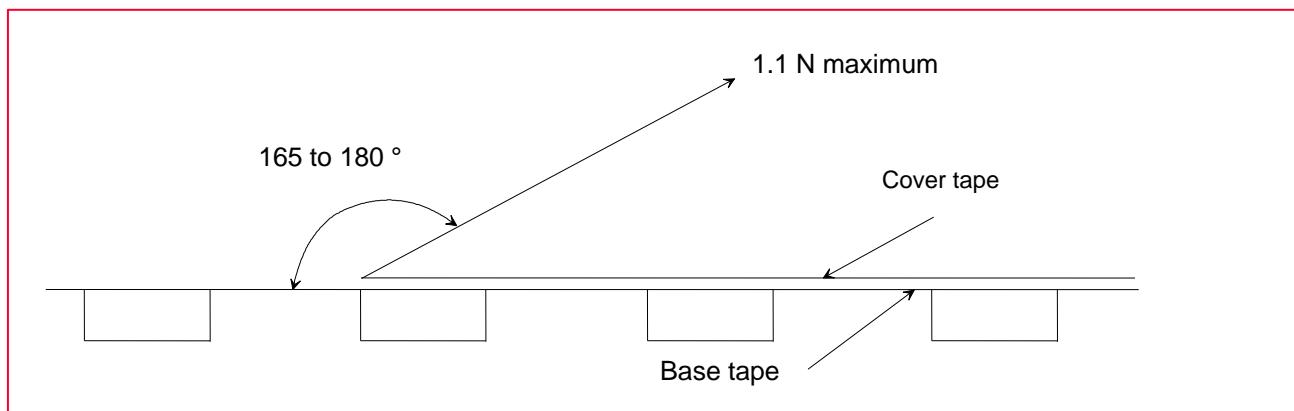

## 16.4 Leader and Tail Tape

The leader and tail tape are shown in **Figure 28**.

**Figure 28: Leader and Tail Tape**

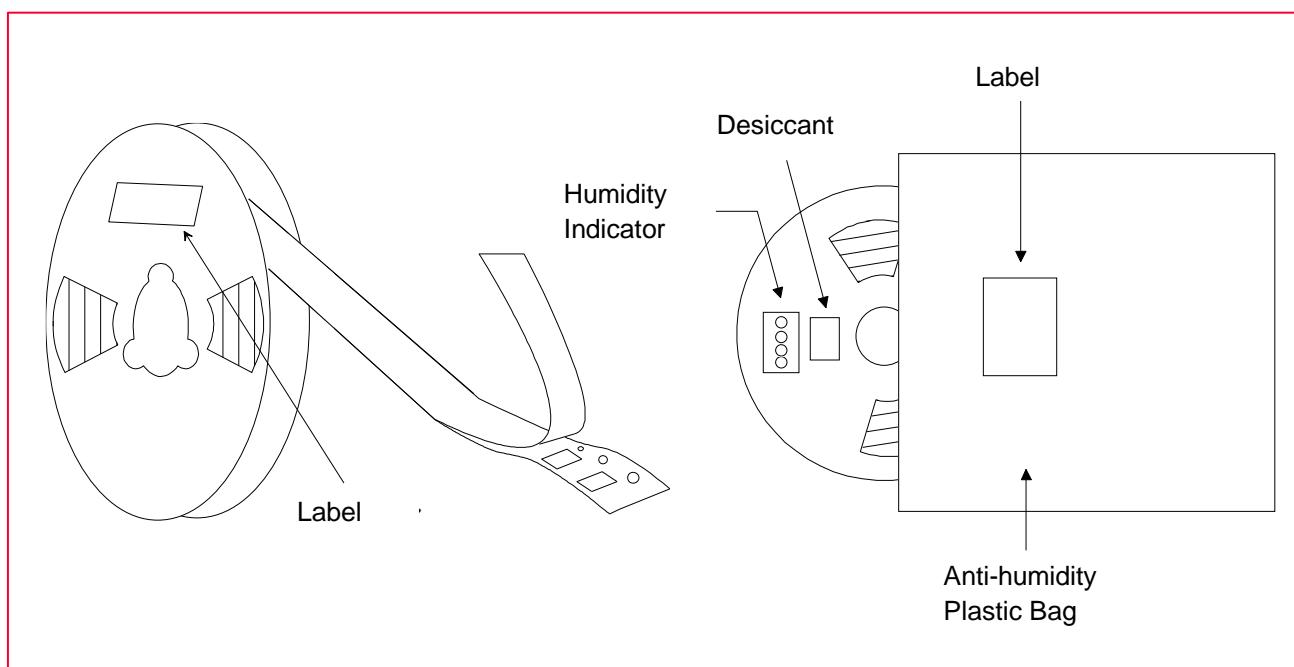

1. The tape for chips is wound clockwise, the feeding holes to the right side as the tape is pulled toward the user.
2. The cover tape and base tape are not adhered at no components area for 250 mm minimum.
3. Tear off strength against pulling of cover tape: 5 N minimum.
4. Packaging unit: 1000 pcs. / Reel
5. Material
  - Base tape: Plastic
  - Real: Plastic
  - Cover tape, cavity tape and reel are made the anti-static processing.
6. Peeling off force: 1.1 N maximum in the direction of peeling as shown in **Figure 29**.

**Figure 29: Peeling Off Force**

## 16.5 Packaging (Humidity Proof Packing)

**Figure 30** shows the humidity proof packaging.

**Figure 30: Humidity Proof Packaging**

Tape and reel must be sealed with the anti-humidity plastic bag. The bag contains the desiccant and the humidity indicator.

## 17 Notice

### 17.1 Storage Conditions

- Please use this product within 6 months after receipt.
- The product shall be stored without opening the packing under the ambient temperature from 5 to 35 °C and humidity from 20 ~ 70 %RH (Packing materials, in particular, may be deformed at the temperature over 40 °C).
- The product left more than 6 months after reception; it needs to be confirmed the solderability before used.
- The product shall be stored in noncorrosive gas (Cl<sub>2</sub>, NH<sub>3</sub>, SO<sub>2</sub>, NO<sub>x</sub>, etc.).
- Any excess mechanical shock including, but not limited to, sticking the packing materials by sharp object and dropping the product, shall not be applied in order not to damage the packing materials.
- This product is applicable to MSL3 (Based on IPC/JEDEC J-STD-020)
  - After the packing opened, the product shall be stored at <30 °C / <60 %RH and the product shall be used within 168 hours.
  - When the color of the indicator in the packing changed, the product shall be baked before soldering.
- Baking condition: 125 +5/-0 °C, 24 hours, 1 time
- The products shall be baked on the heat-resistant tray because the material (Base Tape, Reel Tape and Cover Tape) is not heat-resistant.

### 17.2 Handling Conditions

- Be careful in handling or transporting products because excessive stress or mechanical shock may break products.
- Handle with care if products may have cracks or damages on their terminals. If there is any such damage, the characteristics of products may change. Do not touch products with bare hands that may result in poor solder ability and destroy by static electrical charge.

### 17.3 Standard PCB Design (Land Pattern and Dimensions)

- All the ground terminals should be connected to the ground patterns. Furthermore, the ground pattern should be provided between IN and OUT terminals. Please refer to the specifications for the standard land dimensions.
- The recommended land pattern and dimensions is as Murata's standard. The characteristics of products may vary depending on the pattern drawing method, grounding method, land dimensions, land forming method of the NC terminals and the PCB material and thickness. Therefore, be sure to verify the characteristics in the actual set. When using non-standard lands, contact Murata beforehand.

## 17.4 Notice for Chip Placer

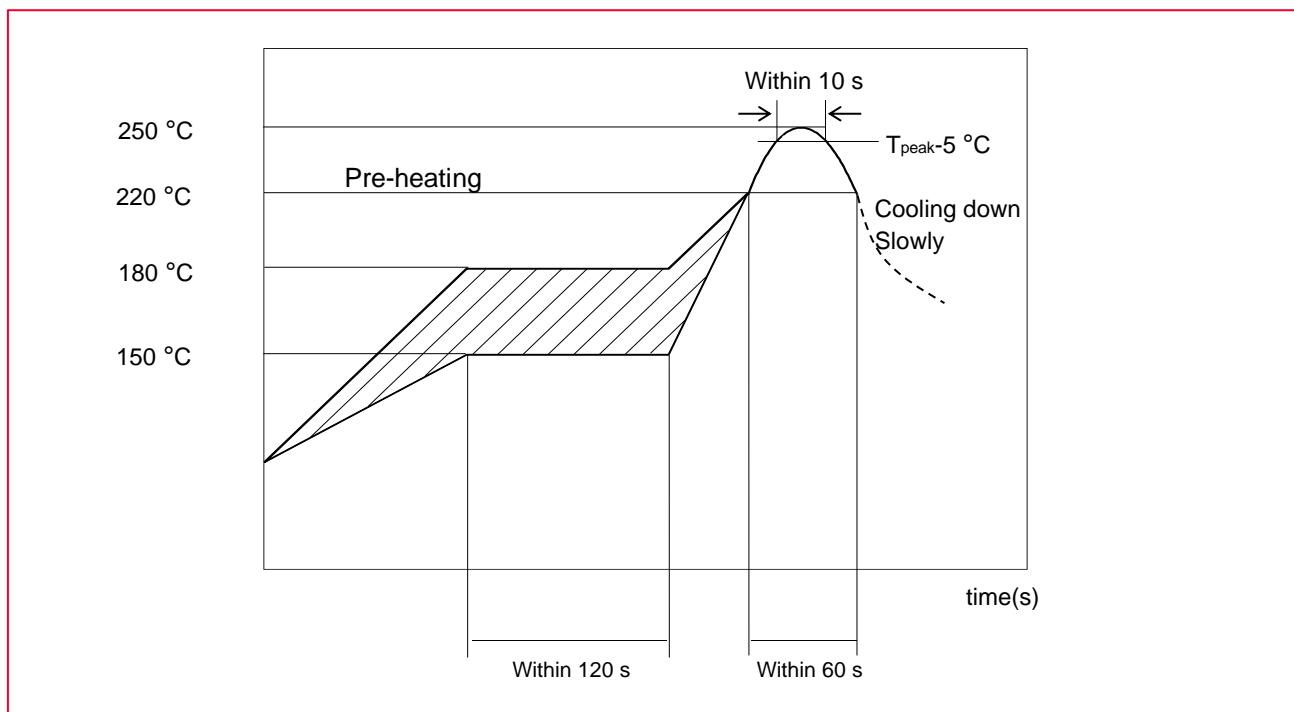

When placing products on the PCB, products may be stressed and broken by uneven forces from a worn-out chucking locating claw or a suction nozzle. To prevent products from damages, be sure to follow the specifications for the maintenance of the chip placer being used. For the positioning of products on the PCB, be aware that mechanical chucking may damage products.

## 17.5 Soldering Conditions

The recommendation conditions of soldering are shown in **Figure 31**.

Soldering must be carried out by the above-mentioned conditions to prevent products from damage. Set up the highest temperature of reflow within 260 °C. Contact Murata before use if concerning other soldering conditions.

**Figure 31: Reflow soldering standard conditions (Example)**

Please use the reflow within 2 times.

Use rosin type flux or weakly active flux with a chlorine content of 0.2 wt. % or less.

## 17.6 Cleaning

This Product is Moisture Sensitive; therefore, any cleaning is not recommended. If any cleaning process is done the customer is responsible for any issues or failures caused by the cleaning process.

## 17.7 Operational Environment Conditions

Products are designed to work for electronic products under normal environmental conditions (ambient temperature, humidity, and pressure). Therefore, products have no problems to be used under the similar conditions to the above-mentioned. However, if products are used under the following circumstances, it may damage products and leakage of electricity and abnormal temperature may occur.

- In an atmosphere containing corrosive gas (Cl<sub>2</sub>, NH<sub>3</sub>, SO<sub>x</sub>, NO<sub>x</sub> etc.).
- In an atmosphere containing combustible and volatile gases.
- Dusty place.
- Direct sunlight place.
- Water splashing place.
- Humid place where water condenses.
- Freezing place.

If there are possibilities for products to be used under the preceding clause, consult with Murata before actual use.

Do not apply static electricity or excessive voltage while assembling and measuring, as it might be a cause of degradation or destruction to apply static electricity to products.

## 18 Preconditions to Use Our Products

PLEASE READ THIS NOTICE BEFORE USING OUR PRODUCTS.

Please make sure that your product has been evaluated and confirmed from the aspect of the fitness for the specifications of our product when our product is mounted to your product.

All the items and parameters in this product specification/datasheet/catalog have been prescribed on the premise that our product is used for the purpose, under the condition and in the environment specified in this specification. You are requested not to use our product deviating from the condition and the environment specified in this specification.

Please note that the only warranty that we provide regarding the products is its conformance to the specifications provided herein. Accordingly, we shall not be responsible for any defects in products or equipment incorporating such products, which are caused under the conditions other than those specified in this specification.

**WE HEREBY DISCLAIM ALL OTHER WARRANTIES REGARDING THE PRODUCTS, EXPRESS OR IMPLIED, INCLUDING WITHOUT LIMITATION ANY WARRANTY OF FITNESS FOR A PARTICULAR PURPOSE, THAT THEY ARE DEFECT-FREE, OR AGAINST INFRINGEMENT OF INTELLECTUAL PROPERTY RIGHTS.**

You agree that you will use any and all software or program code (including but not limited to hcd, firmware, nvram, and blob) we may provide or to be embedded into our product ("Software") provided that you use the Software bundled with our product. **YOU AGREE THAT THE SOFTWARE SHALL BE PROVIDED TO YOU "AS IS" BASIS, MURATA MAKES NO REPRESENTATIONS OR WARRANTIES THAT THE SOFTWARE IS ERROR-FREE OR WILL OPERATE WITHOUT INTERRUPTION. AND MORE, MURATA MAKES NO REPRESENTATIONS OR WARRANTIES OF ANY KIND WHETHER EXPRESS OR IMPLIED WITH RESPECT TO THE SOFTWARE.** MURATA EXPRESSLY DISCLAIM ANY AND ALL WARRANTIES OR CONDITIONS OF MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE NOR THE WARRANTY OF TITLE OR NON-INFRINGEMENT OF INTELLECTUAL PROPERTY RIGHTS.

You shall indemnify and hold harmless us, our affiliates, and our licensor from and against any and all claims, costs, expenses and liabilities (including attorney's fees), which arise in connection with the using the Software.

The product shall not be used in any application listed below which requires especially high reliability for the prevention of such defect as may directly cause damage to the third party's life, body or property. You acknowledge and agree that, if you use our products in such applications, we will not be responsible for any failure to meet such requirements. Furthermore, **YOU AGREE TO INDEMNIFY AND DEFEND US AND OUR AFFILIATES AGAINST ALL CLAIMS, DAMAGES, COSTS, AND EXPENSES THAT MAY BE INCURRED, INCLUDING WITHOUT LIMITATION, ATTORNEY FEES AND COSTS, DUE TO THE USE OF OUR PRODUCTS AND THE SOFTWARE IN SUCH APPLICATIONS.**

- Aircraft equipment.
- Aerospace equipment.
- Undersea equipment.
- Power plant control equipment.
- Medical equipment.
- Traffic signal equipment.

- Burning / explosion control equipment.
- Disaster prevention / crime prevention equipment.
- Transportation equipment (vehicles, trains, ships, elevator, etc.).
- Application of similar complexity and/ or reliability requirements to the applications listed in the above.

We expressly prohibit you from analyzing, breaking, reverse-engineering, remodeling altering, and reproducing our product. Our product cannot be used for the product which is prohibited from being manufactured, used, and sold by the regulations and laws in the world.

We do not warrant or represent that any license, either express or implied, is granted under any our patent right, copyright, mask work right, or our other intellectual property right relating to any combination, machine, or process in which our products or services are used. Information provided by us regarding third-party products or services does not constitute a license from us to use such products or services or a warranty or endorsement thereof. Use of such information may require a license from a third party under the patents or other intellectual property of the third party, or a license from us under our patents or other intellectual property.

Please do not use our products, our technical information and other data provided by us for the purpose of developing of mass-destruction weapons and the purpose of military use.

Moreover, you must comply with "foreign exchange and foreign trade law", the "U.S. export administration regulations", etc.

Please note that we may discontinue the manufacture of our products, due to reasons such as end of supply of materials and/or components from our suppliers.

By signing on specification sheet or approval sheet, you acknowledge that you are the legal representative for your company and that you understand and accept the validity of the contents herein. When you are not able to return the signed version of specification sheet or approval sheet within 30 days from receiving date of specification sheet or approval sheet, it shall be deemed to be your consent on the content of specification sheet or approval sheet. Customer acknowledges that engineering samples may deviate from specifications and may contain defects due to their development status. We reject any liability or product warranty for engineering samples. In particular we disclaim liability for damages caused by

- The use of the engineering sample other than for evaluation purposes, particularly the installation or integration in the product to be sold by you,
- Deviation or lapse in function of engineering sample,
- Improper use of engineering samples.

We disclaim any liability for consequential and incidental damages.

If you can't agree with the above contents, please contact sales.
